

A Leader in Cloud ERP Software for Tribes

Robust Reporting

Dynamics 365 financial reporting tools are designed with finance professionals in mind. Finally, **freedom to build the exact report you need.**

Embedded Power BI dashboards make it easy to see critical data and drill down to gain better insights.

Built-In Automation

AI agents can handle repetitive tasks like account reconciliation, vendor collaboration, and data matching. This frees your team to **focus on meaningful work** and speeds up financial closes and approvals.

Scalability

The core functionality of Dynamics 365 Finance is the 'best-of-breed' for financials, project costing, and purchasing – **configurable and powerful** to meet your unique tribal needs. This software is designed with agility to support your organization as you grow.

Security & Compliance

Microsoft Dynamics 365 Finance has the most secure **Government Cloud** which meets **FedRAMP** compliance requirements – the most comprehensive set of data security standards for the U.S. Government.

Budget controls and grant management functionality is very granular and applicable throughout the entire system to manage specific roles and compliance.

Flexibility

Dynamics 365 is empowered by the Microsoft Power Platform to enable **cross-application workflow automation**. Easily develop purpose-driven applications to meet specific requirements without using code.

Mobility

The Microsoft platform provides a holistic suite of business applications built from the cloud up that allows you to work **any time, anywhere, on any device.**
