COVID Screening & Check-in

Arden Street Labs' COVID Screening & Check-in solutions are trusted by some of our nation's largest hospitals, not only to help protect the staff and patients, but most importantly providing peace of mind that you're well looked after

KEY USE CASES

WORK ENVIRONMENT SCREENING
Rapidly screen and record the details of all persons entering your facility each day. This attestation serves as a record of COVID Risk Factors, such as travel and symptoms

COMMUNITY CHECK-IN
Community based check-in for publicly accessible spaces, such as restaurants, cafes, playgrounds and other areas.

FACILITY CHECK-IN
Leveraging QR tags, allow for staff, visitors and others to "check-in" upon entering common spaces, such as tea rooms, creating a digital logbook for the space

Trusted & Proven
Our screening solutions have been used by over 2 million people, seamlessly integrating into the daily habits and protecting some of our most vulnerable citizens with the solution deployed at a few of the nation's largest hospitals and across the multiple states

WHY ARDEN STREET LABS

BE FUTURE-READY
We work with our clients, providing purpose led continuous innovation. Facilitates business driven solutions, where the solution supports the process, not the process supporting the solution. Where timing is everything, especially when responding to a pandemic.

BUILD ON YOUR TERMS
You have choices. With a commitment to providing our clients the full source code and knowledge transfer post delivery, you can build what you want, when you want and with whom you want. You're unlocked from us as a vendor, allowing us to continue our relationship built on high-quality solutions and trust; not because we own some IP.
