Improve your Employee Experience with Viva Insights complete Implementation - Get started today!

The way we work has changed. Employees want the flexibility to work from home, from the office, from anywhere.

Softwareone is a company with experts in different technological areas.

This is a differentiating point, this solution has **specialists in identity**, this in order to make a quick and transparent implementation in the different configurations necessary for data extraction.

Consultants **specialized in data**, which allows to configure and customize the reports of the information provided by Viva Insights in order to show what each manager requires and tailored to specific business challenges **Advanced query engine**

A strong practice in **ACM** with material included to achieve the adoption of the technology in the organization.
