

# A Trusted Research Environment for Medical Research & Pharmaceuticals

## About Aridhia:

Aridhia helps clinical and life sciences pioneers in Research Hospitals, Universities, Pharmaceutical Companies & Global Medical Networks who want to advance their medical research and improve outcomes more quickly.

## What we offer

The **Aridhia SaaS Digital Research Environment** (or SaaS DRE) is a next-generation cloud-based managed service that provides researchers the tools they need for an end-to-end research lifecycle.

**Aridhia SaaS DRE** is aimed at individual research teams and provides the **Workspaces** component of the enterprise-level Aridhia DRE, packaged as a standalone SaaS offering. Start your analysis immediately and collaborate with study partners across geographic locations by exploring data and building models in real time or work asynchronously with audit trails and notes. Premium subscribers can also access **FAIR Data Services** and the **Aridhia Network** allowing open discovery of metadata throughout the world.

Investigators can invite a team of people into a secure data environment, and that team can upload, access, collaborate and analyse project data while taking advantage of comprehensive analytical tools, scalable compute resources, and virtual desktops for deploying specialised tooling. Full audit and inbound and outbound airlocks ensure end to end traceability and governance.

## What our customers are saying

"The Aridhia research and innovation platform will transform the way in which we manage our research projects, [...] underpinning pioneering research of national and international significance."

– Professor Neil Sebire,  
Chief Research Information Officer,  
Great Ormond Street Hospital

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
