Arkahna

Next Generation Platform Engineering.

INSIDE ARKAHNA

Arkahna is a modular platform engineering solution built on Microsoft Azure. It's designed to streamline cloud adoption, operationalise best practices, and enable innovation with AI. Each Element solves a specific challenge, helping teams build and manage cloud-native environments with consistency and confidence.

ELEMENTS

Core Element
Secure, compliant Azure landing zones to simplify governance and accelerate your cloud adoption.

AI Element
Enterprise-grade conversational AI for secure, scalable integration with your data and apps.

Web Element
Rapidly build secure, scalable web apps with integrated identity and streamlined deployment.

Integration Element
Easily connect your systems, automate workflows, and unify APIs securely at scale.

Data Element
Scalable, compliant data foundation for analytics and AI that simplifies governance and insights.

Deployed to your environment. Backed by Arkahna's continuous improvement. Built to evolve.

KEY BENEFITS

☑ **Cloud-native by design**
Built with Microsoft best practices and automation at the core

☑ **AI-enabled**
Ready to support AI integration across data, apps, and workflows

☑ **Secure and compliant**
Aligns with CAF, NIST, ISO, and SOC2 standards

☑ **Developer-friendly**
Designed to reduce complexity and support faster delivery

☑ **Modular and scalable**
Use what you need, when you need it

PLATFORM ACCELERATORS

FeatureBoard
Reimagine feature flags with controlled rollouts and targeted experiences.

Marketplace Elements
Fast-track Azure Marketplace onboarding with zero engineering for effortless SaaS monetisation.

RUN & OPTIMISE

Sigil
Proactive cloud management ensuring reliability, compliance, and operational excellence.
