## Power Platform COE - Sprint

During a three-week sprint, the focus will be on initiating governance and deployment activities for Power Apps as part of establishing a center of excellence (COE). The team will engage in early adopter programs, designate executive sponsors (BDM), and identify key stakeholders, technical talent, change agents, and champions to lead the efforts. An envisioning workshop will be conducted to determine the organization's backlog of apps.

## Power Platform COE - Sprint

The sprint will include setting up a multidisciplinary team to define business strategies and key performance indicators aligned with technical and business needs. The aim is to ensure organizational readiness, leadership alignment, and comprehensive planning for the pilot program, including feedback mechanisms and support channels to drive continuous engagement and utilization of the solutions.

# Power Platform COE - Fundamentals

## Power Platform

- Drive digital transformation
- Empower your company with low-code/no-code solutions
- Boost productivity and accelerate processes

## Governance

- Cementing the success of Power Platform
- Governance for Power Platform Adoption
- Stay in control with Power Platform

## Maturity and plans for adoption

- Scaling maturity with Power Platform
- Strategic plans with Power Platform
- Adoption plans to maximize the potential of Power Platform
