ARMIS

ASSESSMENT SERVICES FOR BUSINESS DASHBOARDS

IMPLEMENTATION: 2 MONTHS

MOVING BUSINESS THROUGH TECHNOLOGY

WHAT'S POWER BI

Power BI is a cloud-based business analytics service that gives you a single view of your most critical business data. Monitor the health of your business using a live dashboard, create rich interactive reports with Power BI Desktop and access your data on the go with native Power BI Mobile apps.

Although the biggest advantage is in the presentation layer of the information, it is also possible to perform the ETL (Extract, Transform and Load) of the data with this tool. Power BI allows you to connect to a variety of data sources, allowing you to create an integrated environment with data from various sources, ranging from a simple Excel sheet to data from other data sources. With Power BI you can integrate all the data of an organization, whether they are in the cloud or locally.

One of the strengths of Power BI is that it is deeply embedded in the Microsoft product stack. It is included in Office 365, and Microsoft encourages the use of Power BI to view data from other services in the cloud.
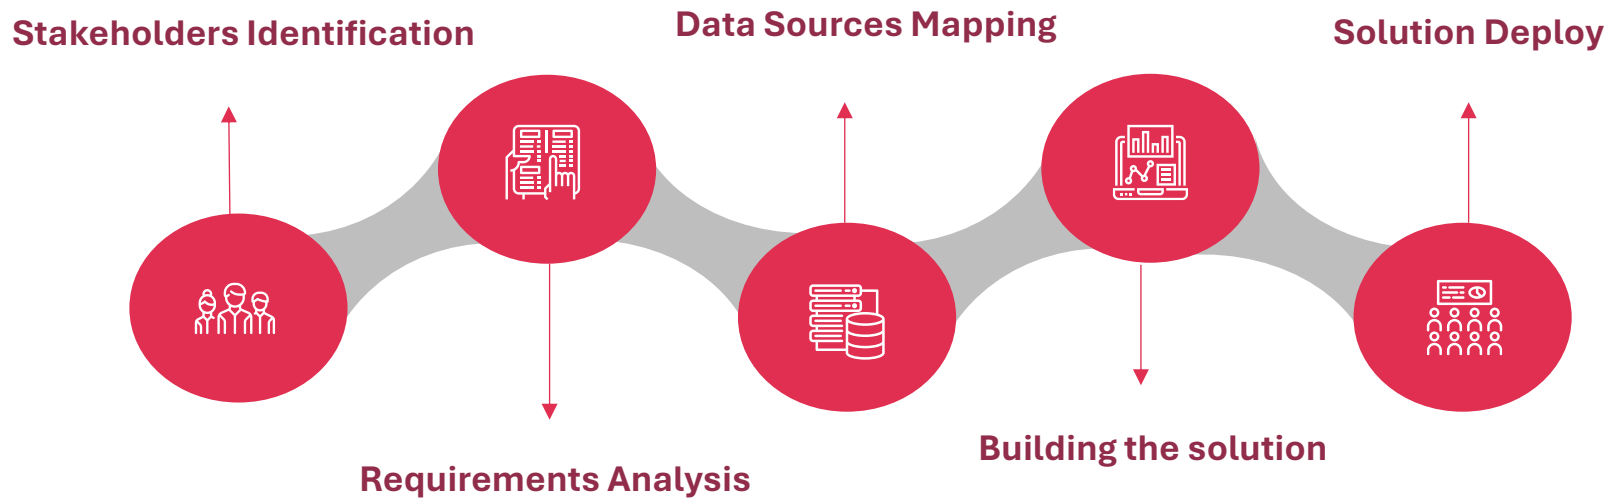

WHAT'S POWER BI

Data Sources

Integrates SQL Server data, Analytics templates, and several other sources of information on the same dashboard

Reports

Advanced reporting tool and possibility to send via email

Usability

With an intuitive dashboard, it allows users to explore all available data

BUSINESS DASHBOARDS

PRODUCT VALUE

Multiple platforms and devices

From a CEO to a salesperson in a out of office meeting with clients, you can access your data anywhere in a secure way. Also you can have organization data in your favourite device, from a native apps for (iPhone, iPad), Android and Windows devices.

For IT

Simplify management, achieve compliance, and keep data secure while giving people access to the insights they need

Continuous development

Since PowerBI is a cloud based solution, easily and effortless for customers the solution is always up to date with no impact on IT.

For Business Users

Always be in the know. View dashboards on the web or on your phone, get alerts when data changes, and drill into details. Your data is at your fingertips

For Analysts

Quickly go from data to insight to action. Connect to hundreds of sources, prep data with ease, and create beautiful reports, all in minutes

CUSTOMER BENEFITS

Minimal upfront costs

PowerBI is a subscription based service, meaning that does not required buying licenses and support. You will only pay for what you'll use.

Up to date

The Power BI product is updated nearly every month with new features and functionalities

Instantly share data and dashboards

Easy to share data with other members of your organization

Ask for data

Any user can ask for data, you can type a simple question (rather than a complex IT language) and get the data

Embed PowerBI with your existing apps

Empower your apps, with an easy way to integrate the dashboards with your current applications (Ex, Sharepoint, webapps, …)
