What does it look like?

Responsible AI Assess projects review capability, develop principles and assess technical complexity

Series of workshops, interviews and playbacks which result in quantified actions & recommendations

As preparation for the Assess, we will tailor the sessions to your team and availability

ASSESS: Responsible AI Capability

Structured interviews across the business to document current capability and gaps

ASSESS: Current AI Landscape

Documentation review, meetings to understand current AI use cases, tools and platforms in use

ASSESS: Responsible AI Principles

Workshop top-down Responsible AI Principles which will form the basis of defining your approach to Responsible AI

ASSESS: Roadmap

Review gaps in capability, agree risk based approach to AI System assurance and build implementation roadmap
