Bitnami Premium by VMware Tanzu

Adding secure software supply chain features and support for all application versions maintained by upstream projects.

Bitnami Premium

Why Choose Bitnami Premium?

Millions of developers around the world use Bitnami Helm charts and containers on a daily basis, deploying them hundreds of millions of times per month in laptops, CI pipelines, and Kubernetes clusters around the world1.

Key Benefits:

- **Standardization on LTS Branches:** If you use long-term-support (LTS) branches of Bitnami application packages such as PostgreSQL or Apache Kafka, you may want to upgrade to Bitnami Premium. Starting December 2024, the free Bitnami catalog will only include and keep the latest branches up-to-date. Bitnami Premium includes all branches supported by the upstream project, kept up-to-date with the latest application and operating system patches1.

- **Enhanced Security:** Bitnami Premium provides SBOMs and other supply chain metadata. This ensures robust validation of what's in your images, meeting your security team's needs for compliance purposes1.

- **Unlimited Docker Hub Pulls:** If your developers and automated infrastructure collectively pull Bitnami apps from Docker Hub thousands of times per month, upgrading to Bitnami Premium could free up your Docker Hub usage quotas for other software and potentially save thousands of dollars per year. Bitnami Premium containers and Helm chart pulls are unlimited and don't count towards those limits1.

How to Get Started:

1. **Visit Our Website:** For more information, visit https://arrow.com/globalecs/na/vendors/bitnami-premium/

2. **Contact Us:** Reach out to our team for personalized assistance and to learn more about how Bitnami Premium can benefit your organization.
