

# Azure Purview: Proof of Concept

## Maximize business value with unified data governance

The already-rich seam of global data shows no sign of slowing down. However, the sheer volume of data in no way translates into equivalent levels of credible insights. As per Gartner, 90% of corporate strategies will cite information as a critical enterprise asset by 2022 so the mantra for organizations has evolved from 'more data' to 'strategic insights.'

As data continues to grow in importance, organizations are facing critical challenges to turn data into insights due to growing data volumes, establishing trust around data and staying compliant.

## Reimagine data governance with Azure Purview

Azure Purview is a unified data governance service that helps you manage and govern your on-premises, multicloud and software-as-a-service (SaaS) data. It enables you to easily create a holistic, up-to-date map of your data landscape and empower data consumers to find valuable, trustworthy data.

Automate data discovery, lineage identification and data classification

Create a unified map of your data across hybrid data sources

Enable effortless discovery of data using business or technical terms

Get insight into the location and movement of sensitive data

## Accelerate your journey with a proof of concept

In this 3-week engagement, we understand your data environment and demonstrate how an effective data governance implementation using Microsoft Azure Purview can help you unlock the strategic value of data.

### Our delivery process

 **Duration: 3 Weeks**  **Cost: \$30,000**

#### Discover

- Identify business challenges, and opportunities.
- Understand the data ecosystem and identify up to two (2) data sources for proof of concept.

#### Build

Deploy a custom Azure Purview implementation in your environment and create data mapping, data classification, business glossary, and data catalog

#### Empower and Review

- Launch, train and handoff the PoC to the team.
- Socialize insights with leadership and provide recommendations for next steps.
