

# Artisight Overview

Imagine a future where healthcare is defined by innovation, simplicity, and efficiency—a future built with intention. At Artisight, we are not just offering a platform; we're reimagining how hospitals work. We're giving clinicians their most valuable asset back—time.

## One Platform. Infinite Possibilities.

Healthcare is complex. But what if it didn't have to be? At Artisight, we asked ourselves, "What if hospitals could operate seamlessly?" The answer: Artisight's Smart Hospital Platform, a system that sees, hears, and understands the environment, just like a clinician.

It's more than technology. It's an extension of care itself—built by clinicians for clinicians. By harnessing the power of AI and an ambient sensor network, Artisight elevates every corner of the hospital, from patient rooms to procedural areas. The goal? To streamline workflows, so your team can focus on what matters most: the patient.

## Crafted for Simplicity, Designed for Impact.

Artisight is transforming the way over 100 hospitals operate. Our platform passively captures data, integrates it with existing EHR systems in real-time, and delivers actionable insights. It's intuitive, elegant, and unobtrusive. Clinicians no longer have to waste time manually entering data—Artisight does it for them.

We believe in empowering leaders to see the bigger picture, to use data not as an obstacle, but as a tool. Artisight brings clarity, offering dynamic analytics that enable healthcare organizations to optimize their resources like never before.

**"The Artisight Smart Hospital Platform advances our vision for the next generation of care delivery."**

Hal Baker, MD, CIO, WellSpan Health

## Features with Purpose

### Computer Vision & Sensor Network

Our HIPAA-certified, patient-protected development process captures and analyzes data from images across our sensor network. It's healthcare through a new lens.

### Indoor Positioning & Real-time Location Systems

Artisight provides real-time, actionable intelligence with industry-leading accuracy. Know where everyone is, and what comes next.

### Video Conferencing

High-quality two-way audio and video are integrated into the platform, allowing for seamless communication using in-room hardware.

### EHR & Third-Party Integration

We integrate effortlessly with EHR systems and third-party applications via FHIR, HL-7, and API connections, enabling sensor data to drive smarter workflows.

### Workflow Automation

From patient rooms to ORs and clinics, Artisight automates the most repetitive tasks, freeing up time and enhancing precision.

### Performance Dashboards & Analytics

See your hospital like never before. Custom dashboards and analytics provide clarity on performance, empowering your organization to make data-driven decisions.

## Solutions for Every Need

- Virtual Nursing
- Virtual Observer
- Translation Services
- TeleConsult
- Staff Duress Alerting
- Ambient Documentation
- Capacity Orchestration
- Hand Hygiene Monitoring
- Inventory Management
- OR Coordination
- Surgical Video Annotation
- Clinic Coordination

**"The Artisight Smart Hospital Platform is a truly comprehensive system. What we're doing now is just the first stepping stone."**

Terri Coutts, Senior Vice President and Chief Digital Officer, Guthrie Clinic
