

Avvia

Modern Cloud IT on Azure by Arvato Systems

The advance of Cloud IT continues but the time for trial and error is long gone. The time is now to break down cloud silos and roll out an overarching cloud landscape at an enterprise scale that is precisely tailored to your company's requirements.

Avvia – The All-in-One Service Portfolio for Modern Cloud IT

The services of the Arvato Systems Avvia portfolio form a modular system, which can be used to efficiently and flexibly put together a Modern Cloud IT at an enterprise scale. All modules are based on best practices, proven processes, and templates and can be designed individually and precisely to align with your needs.

Avvia Cloud Foundation

The foundation for Modern Cloud IT - secure and professionally operated.

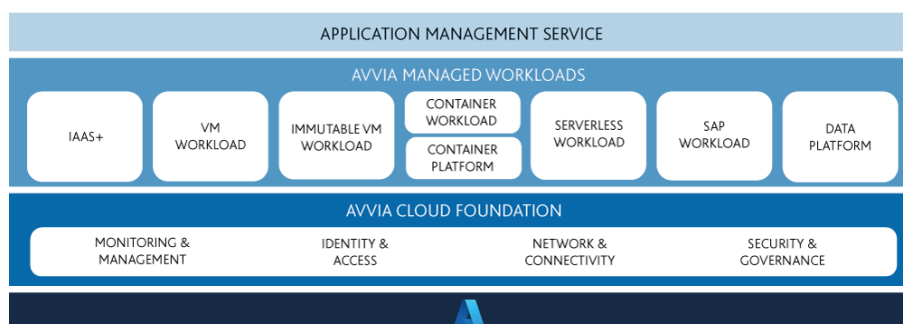

The Avvia Cloud Foundation provides the ideal foundation for operating dedicated managed workloads in the cloud. It offers the best combination of standardization and individual specifications to company needs in four design areas: Monitoring & Management, Identity & Access, Network & Connectivity and Security & Governance.

Avvia Managed Workloads

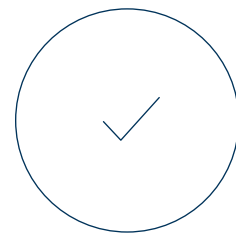

Customized services for the professionally managed operation of dedicated workloads.

When operating workloads in the cloud, different maturity levels, and requirements must be taken into account. With our Managed Workload offerings, we provide customized managed services that are right for you and your workloads - professionally operated with end-to-end responsibility by Arvato Systems.

Avvia Service Portfolio at a Glance

Benefits

- Fast and efficient setup of Managed Cloud IT at an enterprise scale according to best practices
- Professional modern Cloud IT services according to workload types in the co-and fully-managed model
- High level of automation and standardization based on contemporary best practices
- Full transparent pricing model
- Many years of experience and first-hand expertise from Arvato Systems as a Multi-Cloud Service Provider

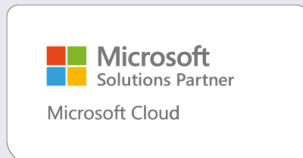

Avvia Operation Models

We offer our Avvia services unmanaged, sandboxed or self-managed, or managed, co-managed or fully managed by Arvato Systems. Choose the operating model that meets your requirements and makes you feel the most comfortable.

UNMANAGED		MANAGED	
SANDBOX The optimal entry point for your developers to try out Modern Cloud IT with Avvia without restrictions by e.g. policies. It is completely isolated from other environments and only available for a pre-defined period.	SELF-MANAGED Operation is handled on your own. We provide consultant support if required. You implement changes yourself without further review by us. The full scope of services of the underlying service levels is available.	CO-MANAGED Provisioning is initially performed by us in the form of Infrastructure-as-Code (IaC). You can make changes directly in the IaC. Before deployment, we do conduct a quality check.	FULL-MANAGED Provisioning and operation is carried out exclusively by us in the form of Infrastructure-as-Code (IaC). Changes can be requested via change request.

Arvato Systems and Microsoft

As a long-standing Microsoft partner, we cover a broad Microsoft portfolio and support you with consulting transition and customized services from Azure and networked communication solutions to innovative platform services in Big Data and Artificial Intelligence. A reasonable basis for driving innovations forward together with our partner Microsoft and supporting you as our customer in Digital Transformation.

About Arvato Systems

Global IT specialist Arvato Systems supports major companies in Digital Transformation. About 3,300 staff in over 25 locations stand for in-depth technology expertise, industry knowledge, and focus on customer requirements. Working as a team, we develop innovative IT solutions, transition our clients into the Cloud, integrate digital processes, and take on IT systems operation and support. As a part of the Bertelsmann-owned Arvato Group network, we have the unique capability to work across the entire value chain. Through our strong strategic partner network with global top players such as AWS, Google, Microsoft, and SAP, we continuously strengthen our know-how and leverage the most advanced technology. We Empower Digital Leaders. arvato-systems.com

4 Steps to Your Modern Cloud IT:

DESIGN

We design your Avvia Cloud Foundation according to your business requirements.

SETUP

We set up your Cloud Foundation via best practices, templates, and frameworks in the form of Infrastructure-as-Code (IaC).

CUSTOMIZING

We customize your foundation to fit your individual needs.

OPERATION

We operate your Modern Cloud IT either as a co- or full-managed service.
