

Azure VMware Solution

Run VMware natively on Azure
and accelerate cloud migration

Jam Session

The cloud journey has many different entry points...

...with many variables impacting
your cloud decisions

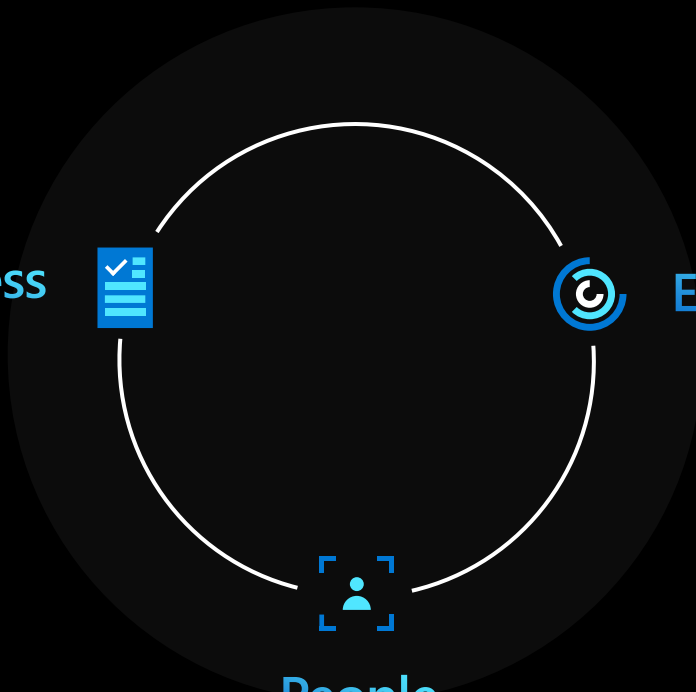

Business

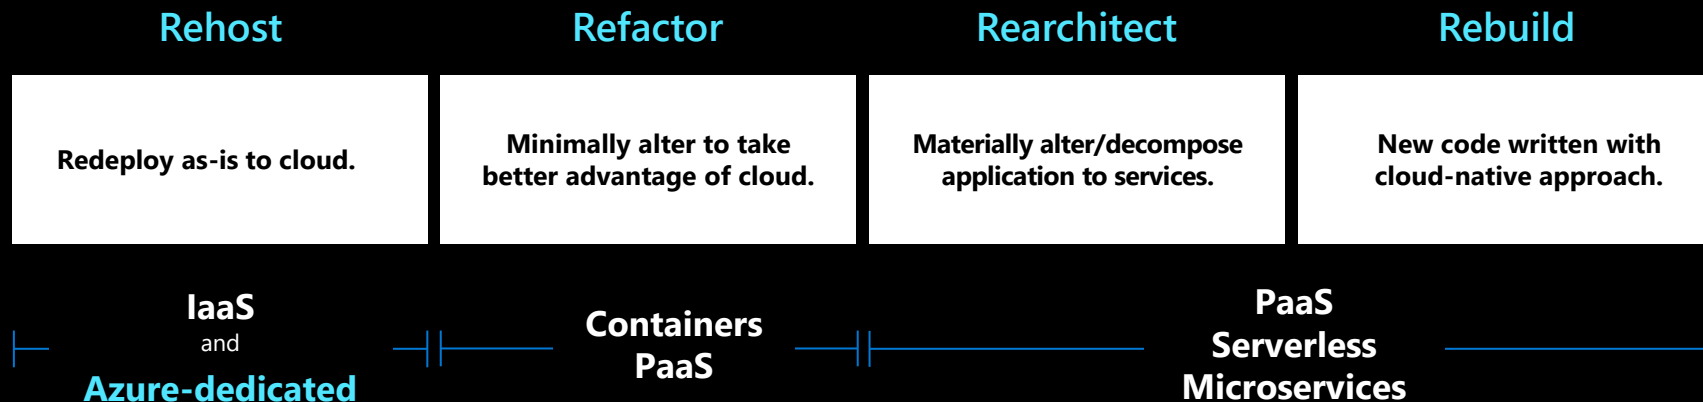

Economic

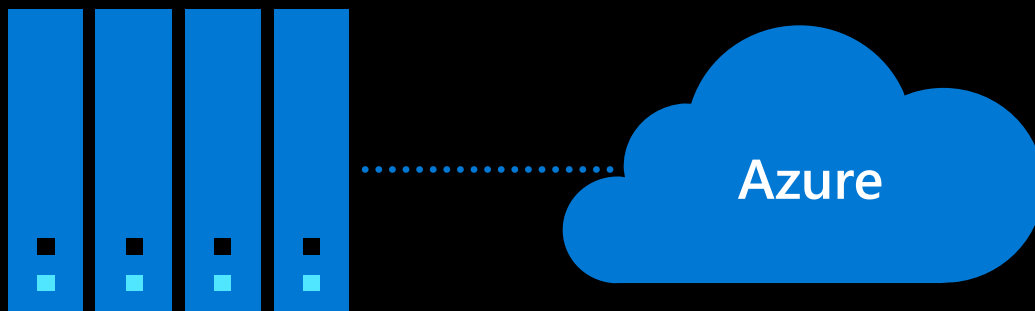

People

Plus, what's the path of applications in the cloud migration?

There is a way forward

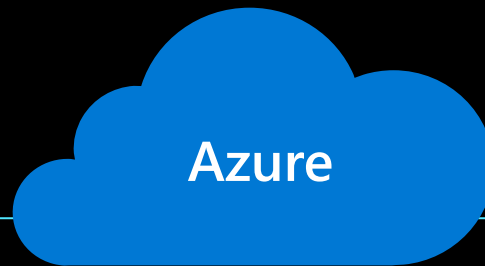

You can accelerate your
cloud migration...

...and, together, we can
help you get there.

Microsoft Azure

Infrastructure designed for every workload

Azure-native IaaS and PaaS offerings

Modern
Apps

Business-
Critical

Dynamic and
Scalable

Seamless integration with additional Azure Services

Backup &
Disaster
Recovery

Security &
Identity

Management
& Operations

Purpose-built Azure for platform continuity

vmware®

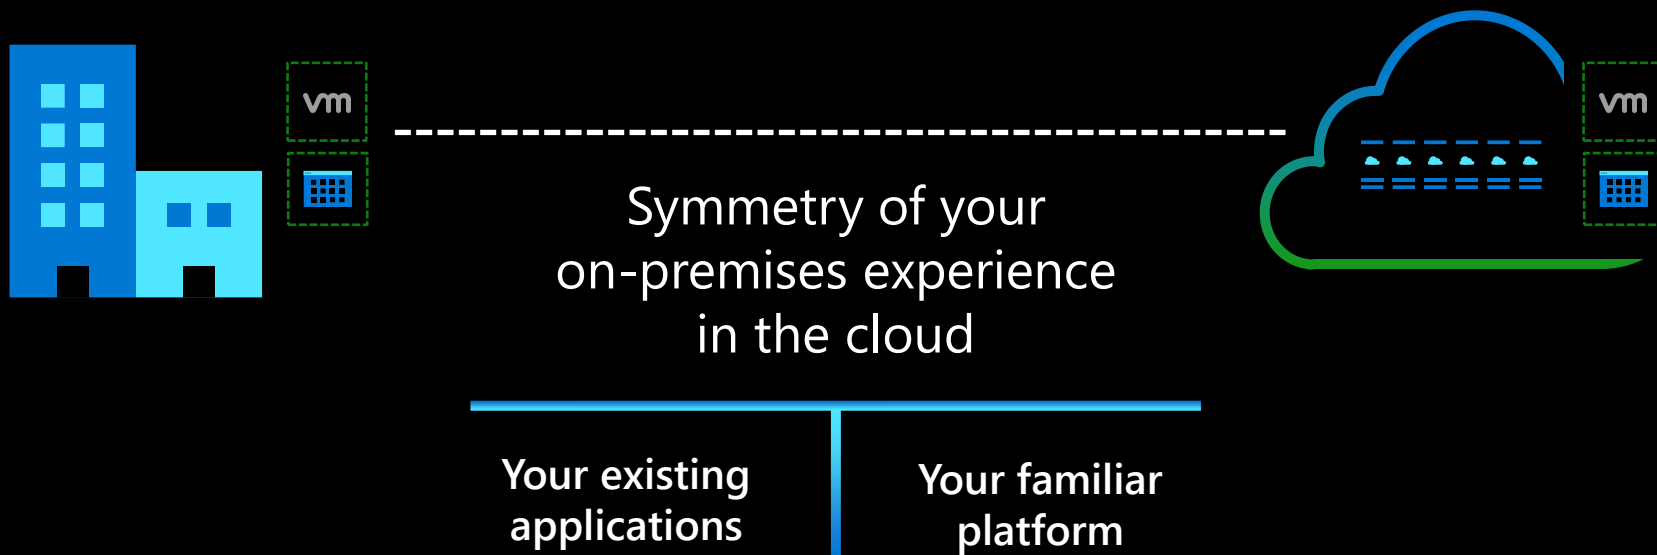

Skytap
for IBM Power

NetApp®

NUTANIX

Microsoft Azure-dedicated

Running your platforms in the cloud

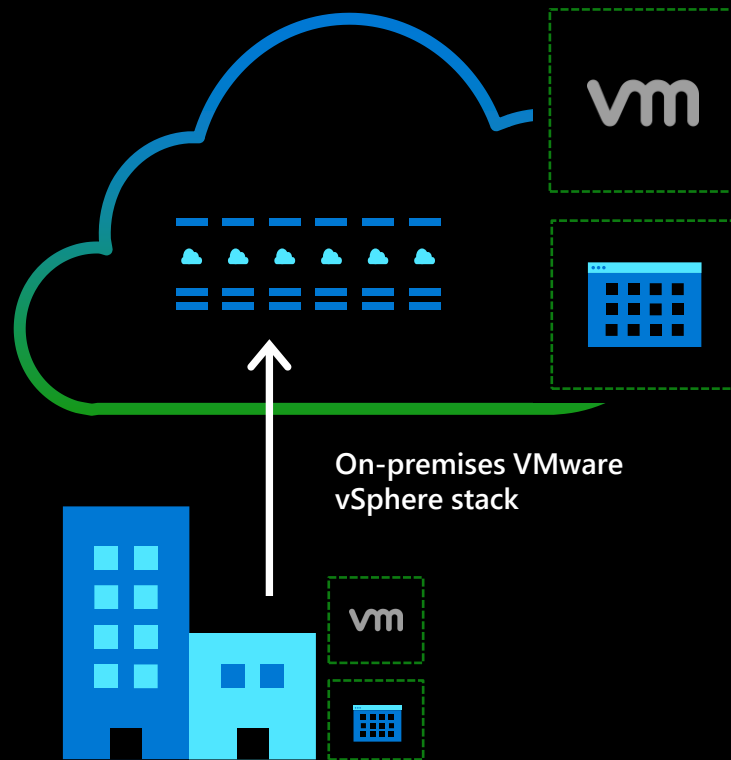

What is Azure VMware Solution?

A comprehensive VMware environment on Azure infrastructure.

Run VMware workloads natively as an Azure service.

Manage and secure applications across VMware environments and Microsoft Azure.

Migrate and extend VMware workloads to the cloud

Reliability
and scale

Accelerate
migration

Modernize
pragmatically

Run best
on Azure

Accelerate your journey to the cloud

Azure VMware Solution

AVS alignment to your business needs

High availability, cloud bursting, and disaster recovery

Speed and simplification of migration/hybrid cloud

IT expansion, datacenter reduction, or retirement

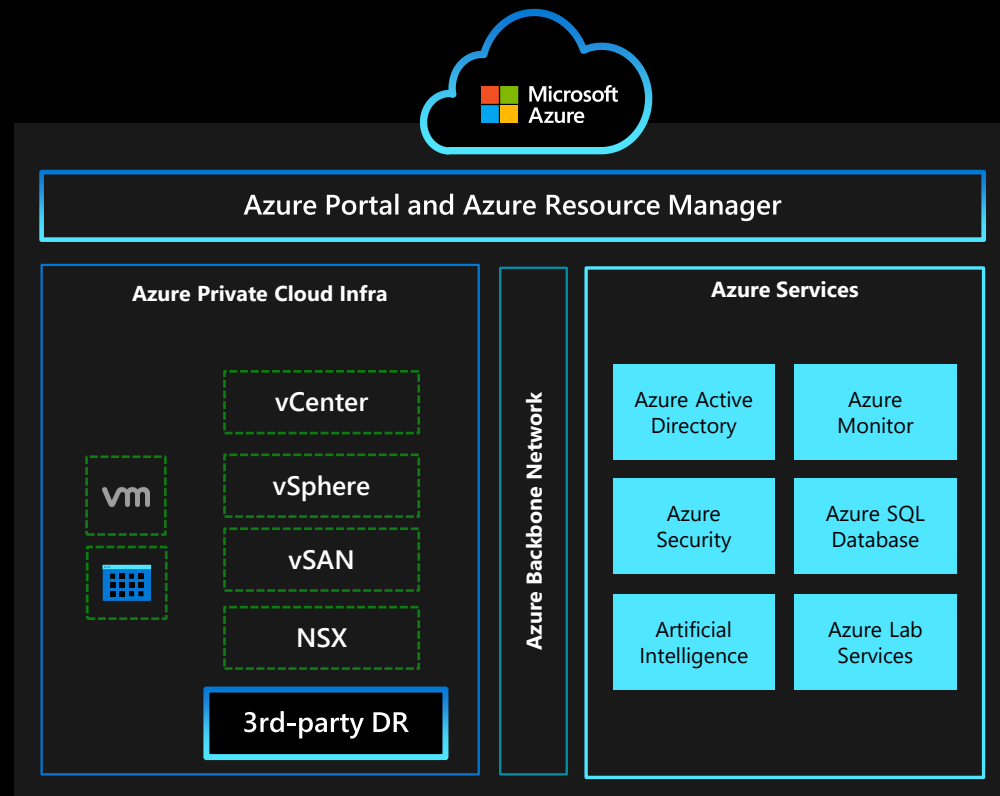

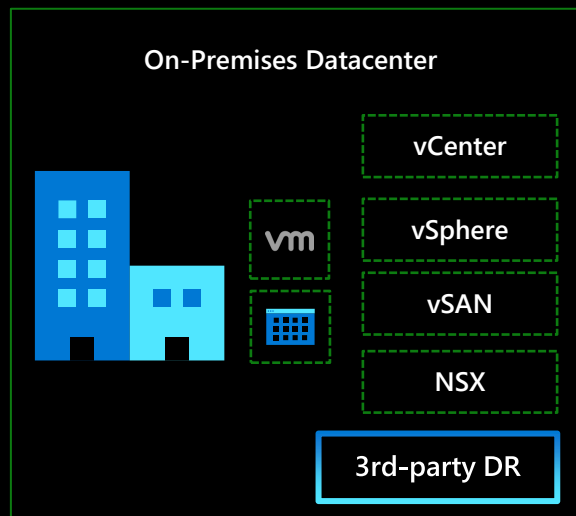

Application modernization, development, and testing

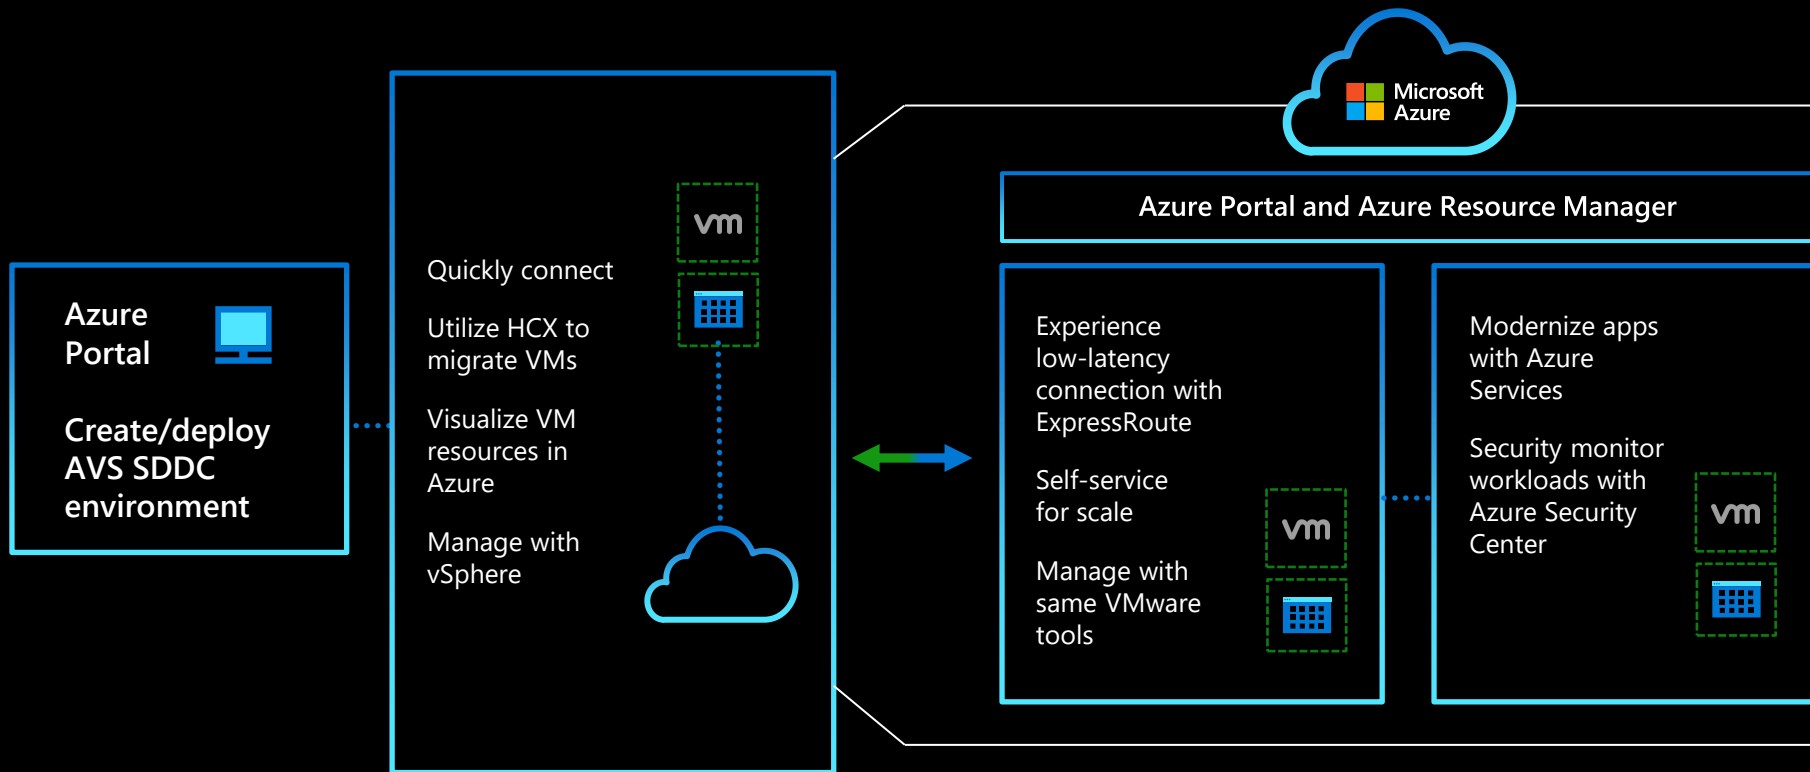

Desktop virtualization in the cloud

Running VMware natively on Azure

Migration made easy

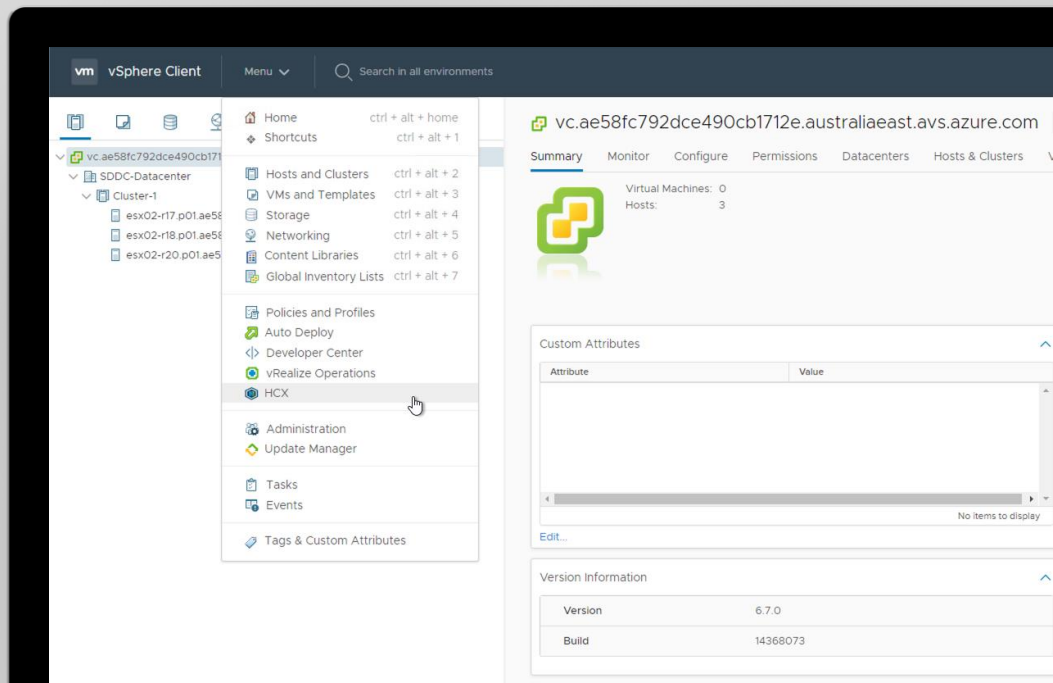

Familiar and consistent VMware tools and technology

Native vSphere support

Fully-featured networking stack

vSphere management, vSAN, and NSX-T

HCX Enterprise now available to support migration

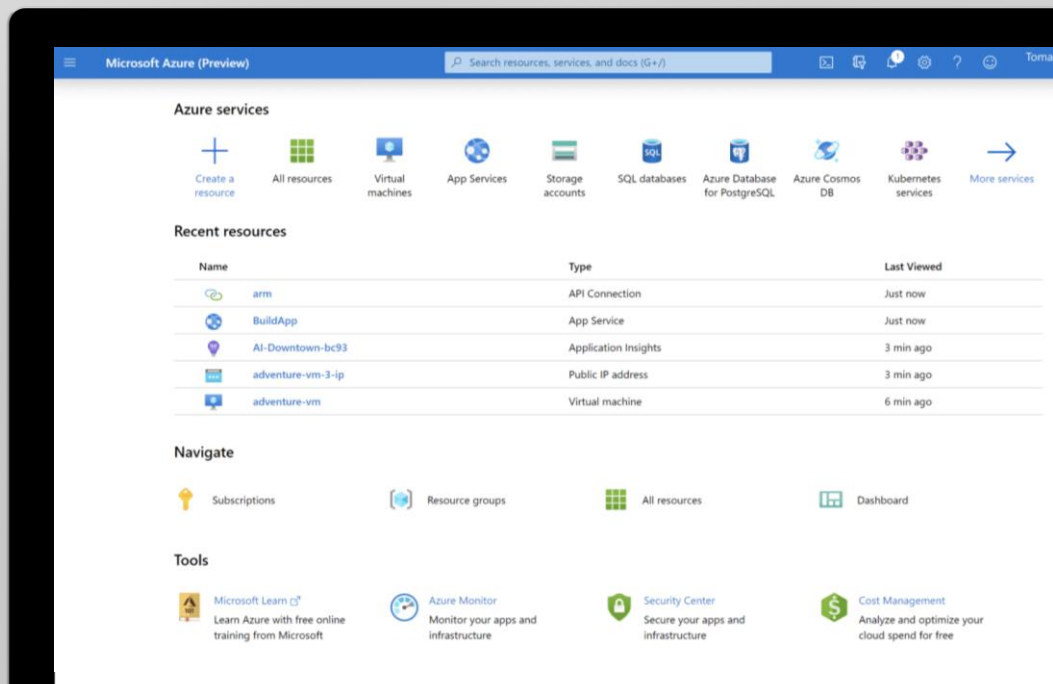

Seamless management for Azure infrastructure resources

Scale infrastructure as your business needs it

Increase compute and storage during peak times

Add and delete new clusters as required:

- Min 3 nodes per cluster
- Max 16 nodes in a vSphere cluster
- Max 64 nodes to an Azure private cloud instance
