

Azure Governance Workshop

Description

The public Azure cloud platform gives engineers and developers a self-service platform with a wide range of services. In order to keep consumption under control and to maintain the overview, a well-developed governance model is needed.

In a 2-day workshop you will get an overview of what solutions Azure offers for this and how you can best use them within your organization. Keep your environment tight and start your public cloud story with a good governance model.

What can you expect?

- ✓ An overview of the most important management tools
- ✓ A mapping of your organization on the governance model
- ✓ Understanding the risks of a public self-service platform
- ✓ A roadmap with possible follow-up actions and projects

Agenda

Day 1

- Workshop design and introduction
- Azure fundamentals (subscriptions, Azure AD, RBAC, resource groups)
- Cloud adoption framework – strategy and planning
- Azure foundation – customer intake environment (whiteboard)
