HIGHLIGHTER
APPLICATION MODERNISATION

ASCENT

START YOUR MODERNISATION JOURNEY WITH CONFIDENCE

Engaging with application modernisation and defining the right scope and complexity for your transformation initiatives is tough.

Ascent's Highlighter engagements are designed to get you moving by breaking down the modernisation challenge into small, digestible blocks that require minimal commitment. We help you set out technical principles that pave the way for larger scale transformation - then roadtest them in a Proof of Concept to demonstrate effectiveness and value. Microsoft will review your potential funding options and align outputs to your wider strategy.

- ✔ 1 hour high-level discovery call
- ✔ 2 hour User Groups & Principles workshop*
- ✔ Actionable, costed plan for 8-10 week Proof of Concept

*Requires application & business process owners, technical lead, project sponsor

WHAT WE DO

We use impact mapping to build a clear view of the relationships between your data, stakeholders, users and business objectives.

We then use this framework to create an accessible technical plan for a Proof of Concept that clearly demonstrates ROI for your organisation.

WHAT YOU GET

An actionable, costed plan that lays the foundations for your modernisation journey - driven by clear business and user needs and designed to deliver immediate outcomes.

We work with you to measure business impact, helping you define a practical route forward that releases incremental value.

WHY ASCENT

Microsoft and Ascent have helped some of the largest businesses in Europe realise the cost and business benefits of application modernisation as part of their cloud journey.

We'll work with you to explore user experience, scalability and security, exploiting modern cloud native services to acclerate your transformation.

READY WHEN YOU ARE

**We'll help you build an effective application modernisation strategy.
