Prove It: OpenAl on Azure.

Do something new. Do something better. 2023

START YOUR OPENAI JOURNEY FASTER WITH ASCENT.

Build an OpenAl prototype in 10 days.

As 1 of 10 Microsoft OpenAl prioritised partners in the UK, Ascent helps you rapidly unlock the business value of Generative Al, backed by Azure's data privacy guarantee.

Our end-to-end approach takes you from collaborative ideation and design to proof of value in just 10 working days, with the option to take your prototype into a production minimum viable product (MVP) in 2 months.

2 Hour Immersion Call (free of charge)

We take your key stakeholders through an OpenAl overview geared to your level of experience and expertise, covering key concepts and capabilities, adoption/deployment models, Responsible Al frameworks and common use cases. Together, we explore generative Al's applicability to your business and explain our approach to proving value and building strong businesses cases.

1 Day Design Workshop (free of charge)

Delivered as a full day workshop or split over two days, we help you ideate and evaluate OpenAI use cases based on our experience and a decision framework that balances impact, complexity, risk, ethical considerations and ROI. We will also advise on funding eligibility from Microsoft for the Build & Prove phase.

10 Day Build & Prove Sprint (\$10k, potentially funded by Microsoft)
We rapidly bring your selected use case to life, leveraging our reference architectures and accelerators to get a functional prototype into your stakeholders' hands as quickly as possible. We iterate with your team daily, culminating in a presentation and final demo on Day 10, accompanied by a validated business case and a clear, costed onward roadmap to production.

Optional Next Step: 60 Day Production MVP (PoA)

We take your prototype to production, providing ongoing thought and process leadership as we incrementally optimise the solution/use case fit through close collaboration. We establish and answer governance and compliance requirements, implementing Dev, Test and Prod automation to support release management. We work closely with you to enable end users, ensuring your investment is embedded and adopted effectively to rapidly release value.

Getting started.

Use case ideation.

Evaluation & selection.

Preparation. (post workshop)

- Kickoff: Introduction and goal setting for the day
- Level setting: Building collective understanding of Generative AI and Azure OpenAI concepts and capabilities. Explaining the designthinking process.
- Context: Exploring your business drivers and parameters

- Inspiring your team:
 Azure OpenAl and
 prompt engineering
 demos with specific
 reference to key use
 cases in your industry
- Collaborative ideation: Generating a long list of use case candidates and opportunities
- Shortlisting: Explore capabilities and requirements of identified use cases to develop a shortlist for further development
- Viability and value assessment: Design-led approach to exploring shortlisted use cases, classifying impact, complexity, risk, ethical considerations, value creation and estimated ROI
- Selection: Identifying the priority use case for prototyping
- Pathway: Decision to proceed with Build & Prove phase, production MVP or further strategic engagement

- Approach: Agreeing the high-level scope and schedule for prototype development. Set success criteria.
- Readiness: Checklist, team composition and prerequisites
- Funding: Confirmation of eligibility for Microsoft funding
- Prepare: Comms channels and working practices for collaboration/ ongoing dialogue with your team

GOAL:

Identify the most valuable, viable use case to take into the prototype Build & Prove phase.

WHAT YOU'LL TAKE AWAY:

An understanding of Generative AI and OpenAI concepts and capabilities

Exposure to key use cases in your industry and the design process to inspire your teams

A list of prioritised, scored candidate use cases for future exploration

A plan for the Build & Prove phase with clear deliverables, prerequisites and defined responsibilities

Guidance on your eligibility for Microsoft funding

Please note this workshop is designed for in-person delivery, either at Ascent's offices in The Shard or at a customer site.

1 Day Design Workshop.

Define & design.

Build.

Enhance.

Present.

Days 1-2

- Recap: Scope, roles and responsibilities
- Definition: Detailed technical use case definition and success criteria, aligned to Responsible Al framework
- Prototype design: Including architecture and data sources
- Deploy: Provision Azure environment. Prepare connectivity and source data access.

Days 3-8

Prototype development:

- Build and configure Open Al persona and model
- Build supporting application and/ or API code
- Daily standups to discuss progress and issues.

Day 9

- Optimise: Iterate on the user journey and responses to increase the relevance of the prototype to your use case
- Playback: Interactive demo and discussion

Day 10

- Handover: Completed prototype with insight and knowledge transfer
- Validate: Establish the feasibility of taking the prototype to production. Identify business benefits, risks and blockers.

GOAL:

Rapidly iterate on your identified priority use case to build a working prototype for validation.

WHAT YOU'LL TAKE AWAY:

Product prototype ready for use, deployed on Azure environment

Documented prototype design and architecture

Validated business case ready to share with your stakeholders

High-level costed roadmap for taking the prototype into full production in 60 days

10 Day Build & Prove Sprint.

A COLLABORATIVE APPROACH.

ENGAGEMENT LEADERSHIP

WHY ASCENT FOR OPENAI?

Ascent is a design-led software, data and cloud business that specialises in advanced analytics and Al.

We design and build Al-driven products, solutions, platforms and experiences on Azure, working in close, transparent partnership with customers to deliver iterative value.

TECHNOLOGY & INNOVATION ADVISORY

DIGITAL EXPERIENCE DESIGN

ENGINEERING SERVICES

MODERN DATA & AI PLATFORMS

Trusted by:

UK Health Security Agency

Total focus on maximising your AI ROI. Strength of people, process and tools, streamlining business value discovery and deployment with proven methodologies, architectures and delivery accelerators.

Consultative skills to translate your business requirements into technical specifications and implementation methodology. Experienced collaborators to listen, advise and strategise, comfortable working with your teams to custom KPIs.

Proven, certified Azure expertise as Microsoft Designated Solution Partner for Data & AI with audited specialisations in AI and Machine Learning and Analytics. Ability to apply elite Microsoft partnership benefits (business roadmap, training, funding, alignment) to customer engagements.

End-to-end capability, from initial business case to in-life service management. Access to certified data and visual engineers, experience designers, architects, data scientists, Al specialists, product owners and delivery leaders.

1 of 10 UK OpenAl prioritised partners and 1 of 70 global Microsoft Al Cloud Partners

Microsoft-audited specialisms in Al & Machine Learning and Analytics

Top tier Microsoft partner for Cloud Infrastructure, Data and Al and Digital and App Innovation

Transparent, collaborative and iterative approach to realising value for customers

Experienced with Responsible Al frameworks and security

Ready when you are.
