

Okta to Entra Migration: Enable and Deploy

Ascent + Microsoft Security Engagement

About Ascent

Ascent is the cybersecurity consulting firm to evolve your strategy and **optimize your Microsoft security investments**.

The firm is founded on Microsoft practitioner expertise and the ability to **meet clients where they are**, regardless of size or maturity.

Our consultants share a determination to **secure and manage entire ecosystems**, ensuring safety from current and emerging threats.

Why Ascent?

E3 to E5 Upsell

SIEM + MXDR + Consumption

Managed Security
+ ongoing footprint expansion

Okta to Entra Migration: Enable and Deploy

Enable

- Enable Microsoft Entra configurations built for your organization
- Ensure consistent access to business apps and services through transition
- Provide training and resources for users and administrators

Deploy

- Migrate user identities, applications, and policies to Entra
- Migrate and configure advanced security features like MFA and conditional access policies
- Validate and optimize Entra environment post-migration

Logistics

- 8 + week timeline
- \$100,000 starting cost (*dependent on project scoping*)

Ascent Services Overview

Ascent offers full-service cybersecurity consulting services

Ascent Solutions offers cybersecurity consulting services right-sized for each client's posture, size, and maturity. Regardless of the cyber-security challenge, Ascent Solutions offers a capability that meets each organization's needs.

ADVISORY SERVICES

Cyber Risk Advisory

Cyber security should ground and center on risk. Cyber Risk Advisory services help our clients articulate, mitigate, and manage risk through quantitative and qualitative measurement and practices.

Cyber Capability Maturity

Security and compliance work together to ensure businesses are reasonably protected. Maturity modeling helps our clients understand their current state in the context of the industry's leading benchmarking frameworks including CMMC, CIS, NIST and more.

Cyber Strategy

Limited resources make sequence and priority critical to your team's success. Cybersecurity Strategy services help our clients be planful with technical implementations through strategic roadmaps and prioritization planning.

Change Enablement

Security Technologies are often disruptive. Our Change Enablement Services help you manage the change to achieve broad adoption and ensure your organization realizes the value of the investment.

CYBERSECURITY SERVICES

Managed Services

Whatever we implement, we can manage. Managed Cloud Operations and Security Operation Services will manage or co-manage your cloud security and productivity technologies on your behalf – or until your team is ready to manage on their own.

Cybersecurity Training Services

With nearly 800,000 unfilled cyber security positions in the US alone, cyber security training services are a top concern for every organization. We can help you train your own resources or provide high-quality trained resources.

M&A Technology and Security Services

Mergers, acquisitions, and divestitures offer unique security and technology challenges. Ascent's M&A Services provide unique planning, integration, and mitigation services during this exciting time for your business.

Ascent Solutions Overview

Ascent offers full-service cybersecurity consulting services

Application Security

Business applications are critical for client business functions and revenue. Application Security solutions is the next iteration of SecDevOps for these critical assets and focuses on the detect to protection lifecycle.

Modern Security Operations

Ascent's SOC, Cyber Threat Intelligence, and Threat and Vulnerability Management practices form comprehensive solutions that can be customized based on size and maturity. If our client has an existing SOC, Ascent can deliver training and processes to advance its maturity.

Zero Trust

Zero Trust Architecture (ZTA) is a security-centric IT strategy. As the industry fumbles through the architecture, we help our clients with practical planning, sequencing, and implementation congruent with this strategy.

Critical Infrastructure

Security is not the same for every industry. We understand the unique nature of the 16 critical infrastructure sectors and how to plan and defend these unique environments.

Identity Security

Security starts with identity. Identity security encompasses all of Identity Access Management (IAM) from Identity Prover (IDP) to Identity Governance and Administration (IGA) and Privilege Access Management (PAM).

Data Security

Every company must protect their data, but these technologies can be disruptive. Ascent Data Protection solution includes data retention, classification, and loss prevention technologies – without all of the unnecessary disruption.

Endpoint Management and Security

Coupled with the industry's leading technologies, our Endpoint Management and Security solution brings together Modern Device Management (MDM) and Endpoint Detection and Response (EDR) solutions fit for the enterprise.

Cloud Security

Cloud security technologies are ever-evolving at the speed of the cloud. Our Cloud Security solutions brings together professional services for Azure, Office 365 – whether it is to accelerate a new capability or fill a gap in your team's current skills.

IoT/OT Security

With the proliferation of internet connect devices, enterprise security practices need to adapt accordingly to protect these often business-critical systems. IoT/OT security solution combines new security technologies with practical policies and procedures for monitoring and maintaining.
