

DATA AND AI

AI KICKSTARTER
FOR EDUCATION

BUILD AI FOUNDATIONS WITH AI KICKSTARTER FOR EDUCATION

Is your institution prepared to unlock the full potential of AI?

Implementing AI without a clear vision and strategy can create considerable operational and reputational risks for education providers. A clear plan is essential to add value and reduce these risks:

- ✘ Fragmented oversight, strategic misalignment, poor ROI and reputational harm
- ✘ Data privacy and compliance failures, issues with student and staff data quality
- ✘ Low adoption, staff and student resistance, skills gaps and operational inefficiencies
- ✘ Unclear educational priorities and missed opportunities to enhance learning outcomes

What is the AI KICKSTARTER

Four focused sessions designed to build a solid foundation for your institution's AI journey, guiding leadership from initial ideas to practical steps.

AI & the Art of the Possible

Explore innovative opportunities to enhance teaching, learning, and administration. Showcase relevant AI solutions and brainstorm authentic scenarios that align with your educational priorities.

Governance & Security for Data/AI

Dive into data privacy, governance, and compliance frameworks tailored for education. Clarify responsibilities and processes to ensure student and staff data is managed securely and AI is deployed safely at scale.

Adoption & Building an AI Culture

Create a comprehensive change and engagement plan for educators, students, and staff. Learn strategies to build a core adoption team and foster scenario-based uptake, driving operational efficiency and improved learning outcomes.

Vision, Goals & Success for AI in Education

Collaboration between ASI's experts and your Steering Group will shape an inspiring AI vision, define clear objectives and measurable results, and prioritise a roadmap that supports sustainable educational advancement and operational excellence.

Set your AI strategy up for success!

Unified Vision and Educational Alignment

Create a clear AI vision that supports your institution's teaching and operations, helping staff focus on impactful initiatives.

Mitigating Risks and Ensuring Readiness

Understand data privacy and compliance to safely implement AI and protect student and staff information.

Accelerated Adoption and School Engagement

Plan change management to involve educators and operations staff, fostering a culture that embraces AI for better learning and efficiency.

Measurable Outcomes and Lasting Educational Impact

Work with experts to set success metrics, track progress, and ensure lasting benefits for your school.

Why choose AI Kickstarter for Education?

- Facilitate the development of a unified vision for AI that aligns with your institution's educational goals and priorities.
- Identify measurable objectives and success criteria for future AI initiatives, ensuring a clear direction for driving improvements in teaching & learning and operations.
- Recognise key data privacy, governance, and security considerations.
- Introduce strategies for building a strong change management and adoption plan, supporting educators, students, and staff through the AI journey.
- Encourage engagement and discussion amongst all stakeholders— leadership, steering and technical teams.
