

**DATA
AND AI**

AI KICKSTARTER

BUILD AI FOUNDATIONS WITH AI KICKSTARTER

Is your organisation prepared to unlock the full potential of AI?

Implementing AI without a clear vision and strategy can create considerable operational and reputational risks for your organisation. A clear plan is essential to add value and reduce these risks:

- ✘ Fragmented oversight, strategic misalignment, poor ROI and reputational harm
- ✘ Data privacy and compliance failures, issues with customer and staff data quality
- ✘ Low adoption, staff resistance, skills gaps and operational inefficiencies
- ✘ Unclear business priorities and missed opportunities to enhance strategic outcomes

What is the AI KICKSTARTER

Aligned to the *AI Plan for the APS*, these four focused sessions are designed to build a solid foundation for your organisation's AI journey, guiding leadership from initial ideas to practical steps.

AI & the Art of the Possible

Explore innovative opportunities to enhance operations, administration and market growth. Showcase relevant AI solutions and brainstorm authentic scenarios that align with your strategic priorities.

Governance & Security for Data/AI

Dive into data privacy, governance, and compliance frameworks tailored for government. Clarify responsibilities and processes to ensure customer and staff data is managed securely and AI is deployed safely at scale.

Adoption & Building an AI Culture

Create a comprehensive change and engagement plan for leaders and staff. Learn strategies to build a core adoption team and foster scenario-based uptake, driving operational efficiency and improved business outcomes.

Vision, Goals & Success for AI

Collaboration between ASI's experts and your Steering Group will shape an inspiring AI vision, define clear objectives and measurable results, and prioritise a roadmap that supports sustainable growth and operational excellence.

Set your AI strategy up for success!

Unified Vision and Business Alignment

Create a clear AI vision that supports your organization's existing strategies, helping staff focus on impactful initiatives.

Mitigating Risks and Ensuring Readiness

Understand data privacy and compliance to safely implement AI and protect customer and staff information.

Accelerated Adoption and Business Engagement

Plan change management to involve leaders and staff, fostering a culture that embraces AI for better efficiency and growth.

Measurable Outcomes and Lasting Business Impact

Work with experts to set success metrics, track progress, and ensure lasting benefits for your organisation.

Why choose AI Kickstarter?

- Facilitate the development of a unified vision for AI that aligns with your organisational goals and priorities.
- Identify measurable objectives and success criteria for future AI initiatives, ensuring a clear direction for driving improvements in operations and market potential.
- Recognise key data privacy, governance, and security considerations.
- Introduce strategies for building a strong change management and adoption plan, supporting everyone through the AI journey.
- Encourage engagement and discussion amongst all stakeholders— leadership, steering and technical teams.
