

# Creating a World without Process Interruptions

## Aspen ProMV®

Get early and accurate warnings for process health, providing insights to prevent off-spec production, maintain efficiency and rapidly optimize operations.

Aspen ProMV enabled \$1.5MM USD per year in energy savings within 4 months. Aspen ProMV highlighted which 'levers to pull' within the 2.5 years of process data consumed to provide the optimal result.

## Aspen ProMV®

Aspen ProMV is a multivariate analysis solution designed specifically for the process industry and its experts. Powerful insights are provided by assessing the behavior of 100's of process variables in real time.

Process interruptions are often thought to be caused by equipment failure, but process health is often an equal contributor to downtime as well as off spec product and energy waste. With so many options for corrective action, Aspen ProMV allow process engineers to see the most critical parameters to address, keeping processes on track in real time.

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

**Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.**
