

# Knowledge and ability to perform tasks requiring a complex analysis and precise solutions

Cloud by Asseco has both the expertise and know-how to perform analysis of software and hardware performance effectiveness as well as to verify the license compliance and to carry out IT environment audits.

We implement and manage services and also provide maintenance and optimization support.

## Knowledge and experience available in each cooperation phase

### Cloud strategy

Preparations carried out in cooperation with customer allows us to prepare such a strategy that unlocks greatest potential resulting from moving to a cloud, focuses on security processes and systems as well as projects the response to changes in the organization.

### Solution planning

Adapting the solutions to the organization needs and implementation of such a configuration that allows for smooth transition to the new level of cloud solutions. All that can be achieved thanks to thoroughly prepared strategy and cooperation of the group of experts.

### Infrastructure management

End-to-end support of certified experts assigned to the project together with the usage of the latest technology releases the maximum potential of the solution. We provide support for platform modernization and for innovation.

### Customers' opinions

As many as 78% of our customers speaks highly of cooperation with Asseco Data Systems highlighting great cooperation with the engineers team and tailoring solutions to the needs, requirements and capabilities of the particular organization.

\* survey conducted on a group of 100 customers in January 2020.

## Key aspects of the environments audit

1. Report on the currently owned resources
2. Optimization and corrective conclusions recommendations
3. Recommendations for effective changes

## Support, optimization and management services.

### IT environment audit:

- IT infrastructure
- Network infrastructure
- Database analysis
- Security
- Verification of the app ecosystem

### Adjustment of environments within the following:

- System performance efficiency
- Environment configuration
- Certificates compatibility and compliance
- Support for the software version
- License adjustment

### Performance, load and stability tests of environments, systems and resources.

- Indication of inefficient resources usage
- Performance adjustment to the software and hardware possibilities
- System stabilization
- Estimation of the increase in needs considering the resources on hand
- Elimination of elements hindering the current potential development

We provide consulting services which help you to start or expand possibility of your Azure platform. We provide specialist knowledge, and know-how.

## Implementing and cooperation process

Start cooperation with a trusted **Microsoft Partner** and let us help your project spread its wings.
