OPERATE WISELY

Improve work performance with a unified platform for data-driven decisions and operations. Connected, automated, and more agile.

ASSETS – Hierarchy, facilities, and equipment

Centralize and view all assets in one place with Asset Manager. Manage custom attributes, check-out/in, and discrepancies.

TELEMETRICS – IIoT measurements, production, and manual entries

Integrate assets and telemetric data to manage, analyze, and respond to signals, such as hydraulic, optical, and mechanical parameters.

MAINTENANCE – Maintenance programs, work orders, and tasks

Ensure asset reliability with customizable maintenance plans, scheduled reminders, and maintenance history.

INSPECTIONS – Custom forms, online and offline

Perform inspections on any modern device. Eliminate paper inspections for good.

WORKFLOWS – Automated triggers and actions, IFTTT

Deploy automated workflows based on telemetric data, maintenance schedules, audit, inventory, and user input.

Proudly serving US oil and gas companies, State regulatory agencies, and other clients. Allow us to demonstrate how we get results at info@assetas.com.
