

ENTERPRISE DOCUMENT GENERATION

INTEGRATE, SIMPLIFY
& ELEVATE

Enterprise businesses face significant challenges related to document generation and automation. Here's what keeps executives up at night:

COMPLEXITY

Dealing with intricate templates and numerous variables and rules is onerous and time-consuming.

INEFFICIENCY

Manual document processes and insufficient document generation systems result in inefficiencies, errors, and delays.

DEPENDENCY

Heavy reliance on key individuals, such as developers or the IT department, hinders scalability and creates bottlenecks.

How do enterprises create professional, error-free, and compliant documents quickly, while prioritising client satisfaction?

DOCUMENT AUTOMATION TRANSFORMED:

SIMPLE. EFFICIENT. AUTONOMOUS.

DocFusion streamlines document creation with a no-code, automated platform, eliminating complexity and inefficiencies.

SIMPLIFIED TEMPLATE DEVELOPMENT

DocFusion offers a user-friendly interface that allows anyone to create and customise templates without coding.

ADVANCED DOCUMENT RULES ENGINE

DocFusion enables advanced automated rules and content creation features for hyper-personalised documents.

STREAMLINED DOCUMENT GENERATION

DocFusion increases efficiency by automating the document generation process.

CENTRALISED CONTENT LIBRARIES

Reusable content libraries enable the creation of subtemplates, promoting consistency and collaboration across teams.

EASY INTEGRATION AND DATA MANAGEMENT

DocFusion seamlessly integrates with existing enterprise systems, leveraging data sources for dynamic document generation.

DIGITAL SIGNATURE INTEGRATION

DocFusion integrates a secure digital signature solution for verified document transactions, enhancing user experience.

DOCFUSION'S UNIQUE FEATURES

- Supports data push and pull strategies for template mapping
- Connects to multiple enterprise systems
- Built for enterprise scale
- No-code/low-code templating
- Democratizes template development

POWERFUL BENEFITS

Faster operational efficiency

Resource optimisation

Error reduction

Enhanced collaboration and control

Consistent compliance

Hyper personalisation

CASE STUDY

FROM CHAOS TO CALM: AN INSURANCE CASE STUDY

A leading Insurance firm faced extreme documentation difficulties due to legacy systems.

CHALLENGES

- Managing a vast array of templates: policy forms, claims, underwriting documents.
- Navigating complexities in multi-product renderings.
- Inefficiencies due to outdated, custom legacy systems.
- Product and legal updates hindered by long software cycles.
- Delays of up to three months for new product launches.
- Bottlenecks causing product owner frustrations.

SOLUTION

- DocFusion's template designer accelerates document creation.
- Enables non-technical staff to manage the template library.
- New product rollouts reduced from months to weeks.
- Greater agility with IT cycle independence.

CASE STUDY

FROM OPERATIONAL OVERHEAD TO OPERATIONAL EXCELLENCE: A BANKING CASE STUDY

A leading bank faced significant documentation challenges due to massive volumes.

CHALLENGES

- Producing 100 million pages annually.
- Operational complexities due to high volume.
- Environmental concerns from massive paper usage.
- Requirement of over 28 000 storage boxes each year

SOLUTION

- Implemented DocFusion for enterprise document generation and automation.
- Streamlined onboarding processes, significantly reducing turnaround time.
- Ensured stringent compliance with industry regulations.
- Enabled robust system management, handling up to 12k transactions per second.
- Facilitated significant reduction in paper consumption.
