

POWER BI MONITORING

MEASURE THE ADOPTION OF POWER BI AND ENFORCE GOVERNANCE

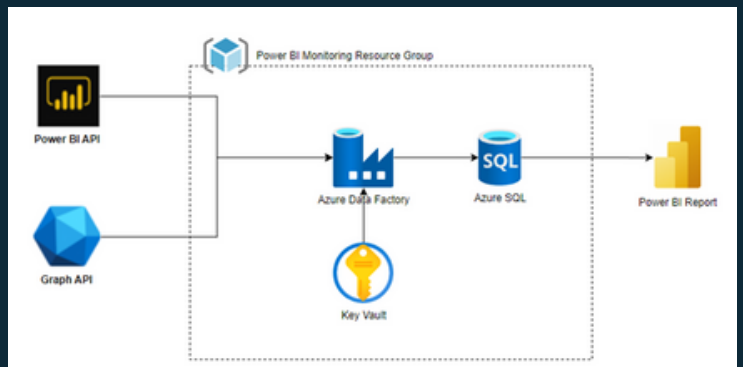

Power BI Monitoring is a service that helps organizations fully understand and control all the extensive functionalities of Power BI. With Power BI Monitoring by Astral Forest, you'll efficiently manage infrastructure, user base expansion, licenses, reports, and data sources to ensure organizational resilience and maintain competitive advantage.

Power BI is an immense set of tools and services that require a strategic approach to mitigate risks and optimize performance. It's virtually impossible without proactive monitoring and diligent management.

WHY CHOOSE POWER BI MONITORING FOR YOUR ORGANIZATION:

- 01** Gain insights into the cost and utilization of Power BI licenses.
- 02** Identify and optimize unused resources to maintain efficiency.
- 03** Track user activities to ensure adherence to organizational policies.
- 04** Safeguard data integrity with robust security and access management.
- 05** Identify key contributors and frequently accessed reports.
- 06** Track lineage of your data and make sure it refreshes correctly.
- 07** Enhance security with visibility into row-level security within datasets.
- 08** Stay abreast of the latest updates in tenant settings for optimal performance.
- 09** Receive tailored recommendations to optimize your Power BI infrastructure.
- 10** Deep dive into report structures with visibility into columns and DAX calculations.
- 11** Visualize usage patterns through intuitive charts based on time, role, or location.
- 12** Monitor key performance indicators with dedicated cards for activity and user insights.

Our solution leverages the power of Power BI and Graph API queries to seamlessly retrieve data from the Power BI Service. These APIs manage access and interaction across data platforms, including Azure and the Power BI Portal. Subsequently, utilizing Azure Data Factory, we ensure smooth data loading into the Azure SQL Database. Here, meticulous processing and transformation occur, culminating in the creating of comprehensive Power BI Monitoring reports.

Deployed within your Azure tenant, our solution offers unparalleled flexibility, allowing you to tailor it precisely to your organization's unique requirements.

Unlock the full potential of Power BI Solutions today and steer your organization toward data-driven success with a custom-made solution and a dedicated team.

Note - As per Microsoft documentation - some metrics will expose names, email addresses of users who have access to Power BI Service
