

Compliance

1 Day Workshop

Compliance and personal data in Azure / M365

Background and purpose

- At present (Feb 2021) there is some uncertainty in some organizations planning to use M365 and Azure.
- This PPT aims to provide a clear picture of issues, as well as suggestions for approaches.
- There is essentially a question:
- Can you have personal information in Azure / 365 and how do you do it?
- There are a number of different tracks that need to be checked, documented and set routines for:
 - Transfer of personal data to third countries (US), as Privacy Shield is not applicable
 - Handling of data with confidentiality by an external party, regardless of whether it is abroad or in Sweden
 - Cloud Act
 - (Patriot Act)
 - (NIS)
- In this workshop:
 - You will get knowledge of compliance needed for Microsoft Azure and Microsoft 365 services
 - You will get insight of the processes to use for be compliance
 - You will after the workshop be able to create your plan for compliance
