

# Build agents in Microsoft Copilot Studio

## Details

The job is divided into three phases.

- Understanding Microsoft Copilot and Copilot Studio
- Instructor-led agent demo in Copilot Studio
- Participant hands on agent lab

## Method

By matching organizational governance with technical governance, we establish a baseline of your current Power Platform adoption. That results in an action plan to remain or get compliant.

## Overview

Introduce your team to Copilot & Copilot Studio and learn how to design and build AI agents. The event concludes with a hands-on LAB where participants will create and deploy their first agent in Copilot Studio.

MCS Agents are low-code / no-code chat bots with 1000+ out of the box connectors ready to integrate with your environment. Microsoft Copilot Studio offer out of the box functionality to add knowledge and interact with your selected company data sources.

Index and chat with your sensitive data or use agent orchestration to automate business processes.

## Job

Asurgent Copilot Studio starter kit includes:

- 1-hour presentation of Microsoft Copilot & Copilot Studio
- 1-hour instructor-led agent demo in Copilot Studio
- 2-hour participant agent lab in Copilot Studio

And by demand can be extended on an hourly rate with:

- Organization training and readiness for Copilot Studio Agents
- Development of your Agent; actions and orchestration
- Agent analytics and training

**Price: 25 000 SEK**
