

## Modern Work Management MEM – assessment

## Overview

Microsoft Endpoint Manager, MEM, helps deliver the modern workplace and modern management to keep your data secure, in the cloud and on-premises.

Endpoint Manager includes the services and tools you use to manage and monitor mobile devices, desktop computers, virtual machines, embedded devices, and servers.

Endpoint Manager combines services you may know and already be using, including Microsoft Intune, Configuration Manager, Desktop Analytics, comanagement, and Windows Autopilot. These services are part of the Microsoft 365 stack to help secure access, protect data, respond to risk, and manage risk.

Scope

With this 8 hour consultant service you will get an assessment

and a plan for your MEM implementation.

**Prerequisites** 

You need to provide us with documentation covering your current setup: Hardware & Software versions, current SCCM installation sequence, MSI-packages and scripts, and group policys.

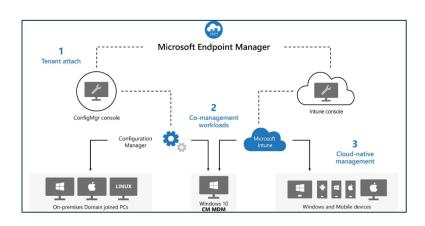

**Deliveries** 

We will deliver:

- configuration description
- Project and implementation activities, RACI and Gantt
- Estimates time consumption
- Licens recommendations
