Power Platform Governance **starter kit**

Overview

Power Platform Governance is a mix of organizational and technical governance, where design and decision dockets match technical actions to ensure your Power Platform configuration and Environments are secure and compliant.

The job results in a current state analysis of your Microsoft Power Platform and its usage. Highlighting non-compliant platform configuration and its deployed resources.

Details

The job is divided into four phases.

- Introduction to Power Platform successful governance
- Introduction to Asurgent Power Platform Governance framework
- Technical deployment of inventory components
- Analysis of current state and recommendations

Job

Power Platform Governance _include_:

- 2-hour workshop of Microsoft Power Platform and best practice
- Deployment of Microsoft Center of Excellence Starter kit
- Deployment of Asurgent Cloud Baseline Governance
- Current state analysis and recommendations

And by demand can be _extended_ on an hourly rate with:

- Governance framework creation
- Environment strategy and Default migration plan
- Default migration of non-compliant resources

Price: 25 000 SEK

Method

By matching organizational governance with technical governance, we establish a baseline of your current Power Platform adoption. That results in an action plan to remain or get compliant.

Asurgent
