How to get ready for Microsoft 365 Copilot?

This is how Atea can help

How to become Copilot ready?

All data you can access, Copilot can see and use, for better or worse!

Make sure you have a well-defined data governance in you organization before you empower your users with Copilot.

About Microsoft 365 Copilot

Copilot can write, edit, summarize, and create documents, based on data in your own organization

- uses artificial intelligence to streamline workflows, promote collaboration, and provide valuable data-driven insights.
- combines large language models with your data in Microsoft Graph and Microsoft 365
- pulling information from your entire organization as needed.
