

Release the information with SharePoint Online

Employees today want to be able to work from anywhere and thus have access to digital information and resources whether they are working in the office, at home or from their smart devices. They expect to be able to collaborate and share information, without restrictions, no matter where in the world they may be. With Microsoft Office 365, many of these wishes can be fulfilled out of the box. Through the SharePoint Online service your company and end users can create an always-on intranet, that can act as the central hub for department sites, pages, lists and documents and more.

With this offer - our implementation process is what you buy, the finished solution will run on SharePoint Online through your own Office 365 agreement with Microsoft.

1. Kick-off and planning meeting
2. Design workshop with the business
3. Primary configuration sprint
4. Solution review and feedback
5. Concluding configuration sprint
6. Content editor training workshop
7. Handover and sign-off

There is no hidden support agreements or mandatory vendor lock-in to be associated.

Kickstart your modern intranet today:

- ✓ Through our vast experience, we will help you create a modern, flexible and scalable cloud intranet, based on SharePoint greenfield innovation.
- ✓ Get information access and mobility, in full interaction with the other Office 365 applications, through a responsive modern experience based solution.
