# Azure Governance

## CloudTrack – Cloud Governance

**Atea Finland**

ATEA

# Azure Governance

Atea's CloudTrack Governance workshop established the governance model and principles on how Azure is used within the organization.

It provides guidance and rules for both internal teams and partners regarding how services should be deployed and managed in accordance with the organization's requirements.

ATEA

# **Governance Model** will cover following topics

- Roles and responsibilities
- Azure billing and Entra ID tenant
- Identity and Access Management
- Management Group and Subscription design
- Resource organization
- Naming Convention
- Tagging
- Network topology and connectivity
- Security
- Policies
- Logging and monitoring
- Update management
- Backup and recovery
- Cost management
- Automation and DevOps

ATEA

We build **the future** with IT
