CloudTrack Management

Delivering on a cloud strategy requires solid planning, readiness, and adoption commitments. But it's the ongoing operation of the digital assets that *will ensure the tangible business outcomes* of the cloud …
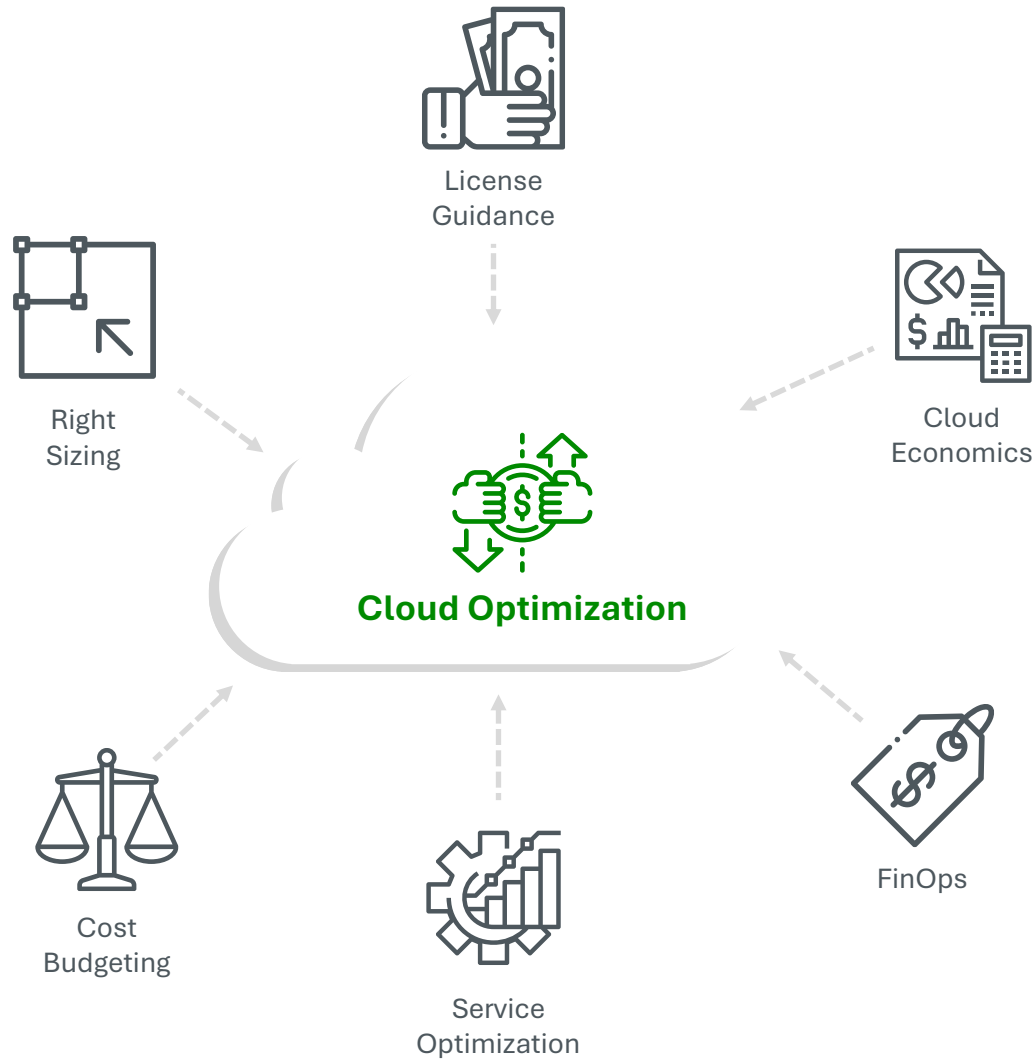

… without reliable and *well-managed operations* for your cloud solutions, the *efforts might yield little value* and could even introduce new problems

ATEA

CloudTrack Security

With our help you will get a *vendor independent and objective* security review of your cloud platform and deployed services, where you will end up with a *customer-specific analysis* including *our recommendations*

Together we ensure that *relevant areas are highlighted* and analyzed based on *industry security standards* and *best practices*

CloudTrack Optimization

Your IT platform is running in the cloud and your *consumption is spiraling out of control* - We can help you ensure, that your cloud resources are utilized as efficiently as possible and assist in *keeping the costs down*
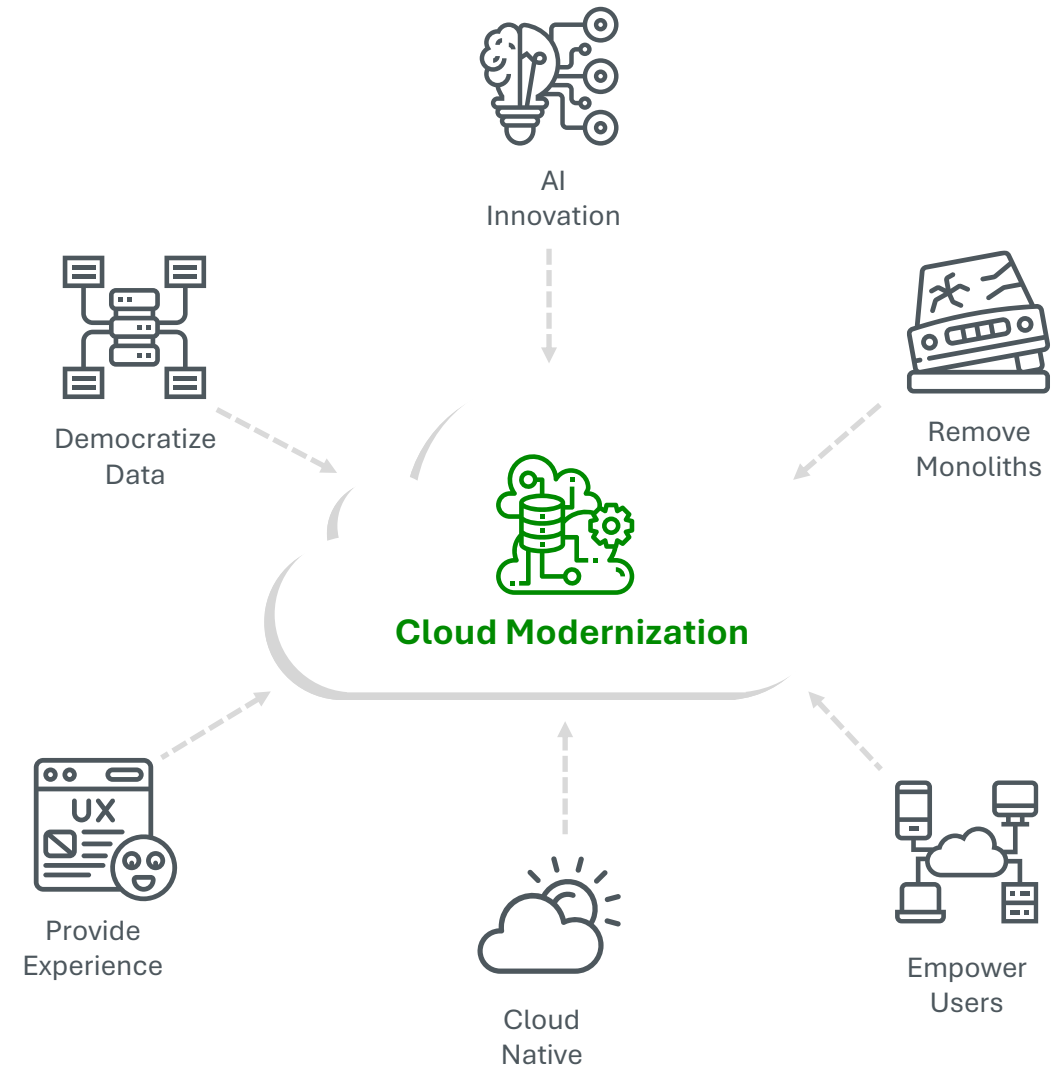

Our Cost Optimization journey will *give you oversight and help you* with continually evaluating your cloud - so you *only pay for what you need*
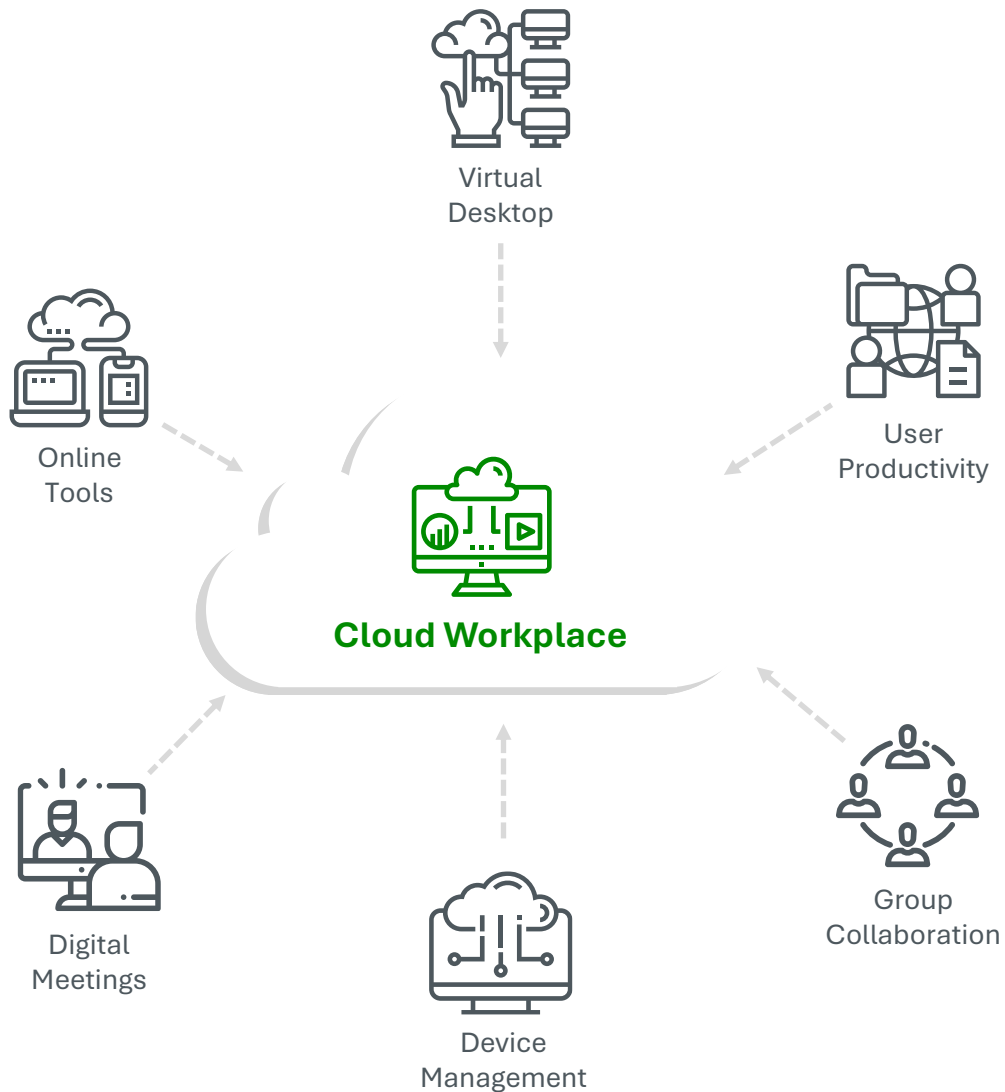

ATEA

CloudTrack Modernization

All IT portfolios contain some **workloads and ideas** that could significantly **improve the company's position in the market** - by being modernized ...

... examples of this could be **re-architecting your applications** for cloud **native scalability and mobility,** and utilize innovative services and connect relevant devices to create **new experiences and use cases** *with your data*

AI Innovation

Democratize Data
