

AI Discovery Workshop

Exploring AI Possibilities with Strategic Clarity

AI is transforming how organisations operate — but knowing where to start, what to prioritise, and how to scale can be challenging. Whether you're looking to use existing tools, customise solutions, or simply prepare your business for AI, our **AI Discovery Workshop** helps you explore the possibilities and build clarity around your ambitions.

Led by our AI specialists, this collaborative session moves you from reactive experimentation to proactive, strategic planning — unlocking faster, more meaningful outcomes.

Why Take a Workshop?

We understand that organisations are under pressure to innovate with AI — often without the skills, strategy, or structure to do so confidently. It's easy to get caught up in the hype or stuck in pilot mode.

Our workshop helps you pause, reflect, and realign. It's a chance to explore how AI can support your business objectives, guided by experts who understand both the technology and the bigger picture.

This isn't just a tech conversation — it's a strategic planning session that helps you move faster, make better decisions, and realise value sooner.

Our Workshop Will Help You...

1. **Focus where it matters** — Ensure your investments directly support your goals and solve key challenges.
2. **Uncover high-impact use cases** — Explore opportunities across departments and prioritise based on feasibility and value.
3. **Accelerate decisions** — Cut through complexity with expert guidance and a clear roadmap.
4. **Realise value sooner** — Leave with actionable next steps and a phased strategy.
5. **Maximise value** — Identify funding, incentives, and scalable approaches to AI adoption.

How Does It Work?

Our AI Discovery Workshop is a structured engagement designed for senior leaders and technology stakeholders.

Discovery Workshop

It begins with a collaborative session, delivered by our specialists to explore your goals, challenges, and AI readiness.

Planning

We reflect on the session and shape clear, actionable recommendations — building a high-level roadmap that supports your business objectives and AI ambitions.

Follow Up Session

We present your high-level AI strategy, walk through the roadmap, and discuss next steps — ensuring alignment and setting the stage for deeper engagement or pilot initiatives.

Together we'll Explore:

Your business challenges, priorities, and aspirations.

Your current technology and data landscape.

Existing AI initiatives and readiness.

Potential AI use cases and blockers.

What will I Get?

Following the playback session, you'll receive a tailored set of outputs designed to help you move forward with clarity and confidence:

- ❑ Workshop outputs captured during the session.
- ❑ Understand where you are today and your AI maturity baseline.
- ❑ Recommendations for immediate actions to enhance your AI strategy.
- ❑ High-level AI roadmap outlining quick wins, foundational steps, and long-term vision.
- ❑ Next steps and follow-up actions to support deeper engagement or pilot initiatives.

Why Work With Us?

We help you move faster, make better decisions, and realise value sooner — with guidance you won't find elsewhere.

Our experts bring:

- Deep AI and data expertise across platforms and industries.
- Experience delivering real-world AI transformation.
- Best practices and lessons learned from successful AI adoption.
- Strong vendor relationships unlocking exclusive insights and support.
