

Copilot Envisioning and Proof of Concept

Explore The Possibilities and Prove Value with Microsoft Copilot

Microsoft 365 Copilot has the power to transform how your teams work, but knowing what's possible, where to start, and how to maximise return is key. Atech's Copilot Envisioning & Proof of Concept engagement helps you visualise the potential of AI, assess your readiness, and experience the real value of AI through a guided, hands-on programme.

Combining deep Microsoft expertise with proven delivery, we partner with you to define Copilot's role in your business, identify high-value use cases, and demonstrate outcomes in your own environment.

This engagement will help you to:

Accelerate AI adoption
Gain clarity, reduce risk, and move from concept to value with structured guidance and delivery.

Identify key use cases
Uncover impactful Copilot scenarios tailored to your teams, processes, and data environment.

Build business value
Demonstrate measurable ROI, secure stakeholder buy-in, and establish a roadmap for long-term success.

How does it work?

Our engagement follows a proven framework, adapted to your unique needs:

Inspire

Discover what Copilot can do through real-world demos and AI innovation examples tailored to your industry.

Assess

Evaluate your organisation's readiness across data, technology, and people to ensure a strong foundation for Copilot.

Design

Define your priority use cases, build a business case, and create a practical roadmap for adoption and rollout.

Proof of Concept

Deploy a scoped Proof of Concept with hands-on support, real user feedback, and measurable business impact.

What will I get?

- Tailored use case identification
- Hands on experience with copilot
- Value assessment and ROI insights
- Technical readiness evaluation
- Value summary and next steps

This is a Microsoft-funded engagement, meaning your organisation may qualify for full funding. Contact us to confirm eligibility.

Trusted to deliver

As a trusted Microsoft partner, we combine strong credentials in cloud, data, and security with a proven approach to adoption. While AI is new for many, our experience guiding transformation journeys, access to Microsoft funding, and commitment to long-term success makes us the right partner to help you move forward with confidence.
