

Threat Protection Engagement

Learn how to put next-generation
Microsoft security tools to work for you

Do you know how many phishing attacks your organisation has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organization's cloud environment as secure as you think it is?

Organisations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Defend Against Threats with SIEM Plus XDR Workshop.

We can help you develop a strategic plan customized for your organisation and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward.

By attending this workshop, you can:

- 1 Identify current, ongoing security threats in your cloud environment
- 2 Walk away with actionable next steps based on your specific needs and objectives

- 3 Document your security strategy for the benefit of key stakeholders
- 4 Better understand how to accelerate your security journey using the latest tools

Engagement highlights

Review your security goals and objectives

Identify real threats in your cloud environment with Threat Check

Map identified threats to specific solution Recommendations

Showcase security scenarios with product Demos

Develop joint plans and next steps

Improve your security posture with a Defend Against Threats with SIEM Plus XDR Engagement

What to expect

During this workshop, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- ➊ Deep analysis of cyberattack threats that are found targeting your organisation
- ➋ Actionable recommendations to help immediately mitigate the identified threats
- ➌ A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity pros
- ➍ An inside look at Microsoft's holistic approach to security, and how it relates to your organisation
- ➎ Demonstrations of integrated security, including the latest tools and methods
- ➏ Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps

Who should attend

The workshop is intended for security decision-makers such as:

- ➊ Chief Information Security Officer (CISO)
- ➋ Chief Information Officer (CIO)
- ➌ Chief (CSO)
- ➍ Data Protection Officer
- ➎ Data Governance Officer
- ➏ IT Security, IT Compliance, and/or IT Operations
- ➐ Data Governance

Engagement Overview

-  Pre-engagement meeting
-  Kick-off Meeting
-  Cloud Discovery Log Collection
-  Threat Exploration
-  Results Presentation
-  Engagement Decommissioning

Why Atech?

Atech specialises in Microsoft Modern work and Security with more than a decade of experience in Microsoft 365 Business Solutions. We manage deployment, licensing and migration to the cloud, so that you can focus on growing your business.

Atech delivers tailored Microsoft 365 solutions to thousands of companies in the UK and worldwide. We couple out-of-the-box thinking with proven strategy to create a unique cloud-based solution for every one of our clients.
