

Reliable and affordable Cloud Disaster Recovery.

Atende is one of the leading capital groups in the IT sector in Poland. 29 years ago we connected the first Polish companies to the Internet. Since then, every day we build the success of our customers with the latest and most advanced solutions in the field of IT infrastructure and innovative software. An increasingly important part of our business is cloud computing and managed services. As a group consolidating eight companies, we provide comprehensive IT systems for the most important market segments: telecommunications, energy, public administration, media, finance and healthcare.

Cloud Disaster Recovery

DISASTER RECOVERY

Cloud Disaster Recovery provides critical IT resources in case of an incident, emergency or disaster. The goal is to maintain business and operations as usual despite the failures. It is fully managed by Atende experts and delivered in pay-as-you-use model, so it is affordable for every company that needs it.

CLOSE COOPERATION

Atende has been providing IT managed services for over a dozen years. Our focus is customer close cooperation and service excellence. Our dedicated service level managers help fast response and resolution. They provide support for day-to-day operations and continuous improvement.

AZURE SITE RECOVERY

Cloud Disaster Recovery uses Microsoft Azure Site Recovery to provide ease of deployment, cost effectiveness, and dependability to keep your applications running during outages. For your comfort and convenience our solution is fully managed by Atende cloud experts available 24x7.

BETTER TOGETHER

Microsoft Azure is the foundation of Cloud Disaster Recovery service. Microsoft builds services that meet the highest standards of security, privacy, compliance and transparency. Atende is responsible to configure and manage these services properly to ensure efficient operation.

Disaster Recovery or DR is the ability of an organization to provide critical Information Technology (IT) and telecommunications capabilities and services, after it is disrupted by an incident, emergency or disaster.

Business Continuity or BC aims to safeguard the interests of an organization and its key stakeholders by protecting its critical business functions (CBFs) against predetermined disruptions.
