- Clever
- Ed-Fi
- Microsoft 365

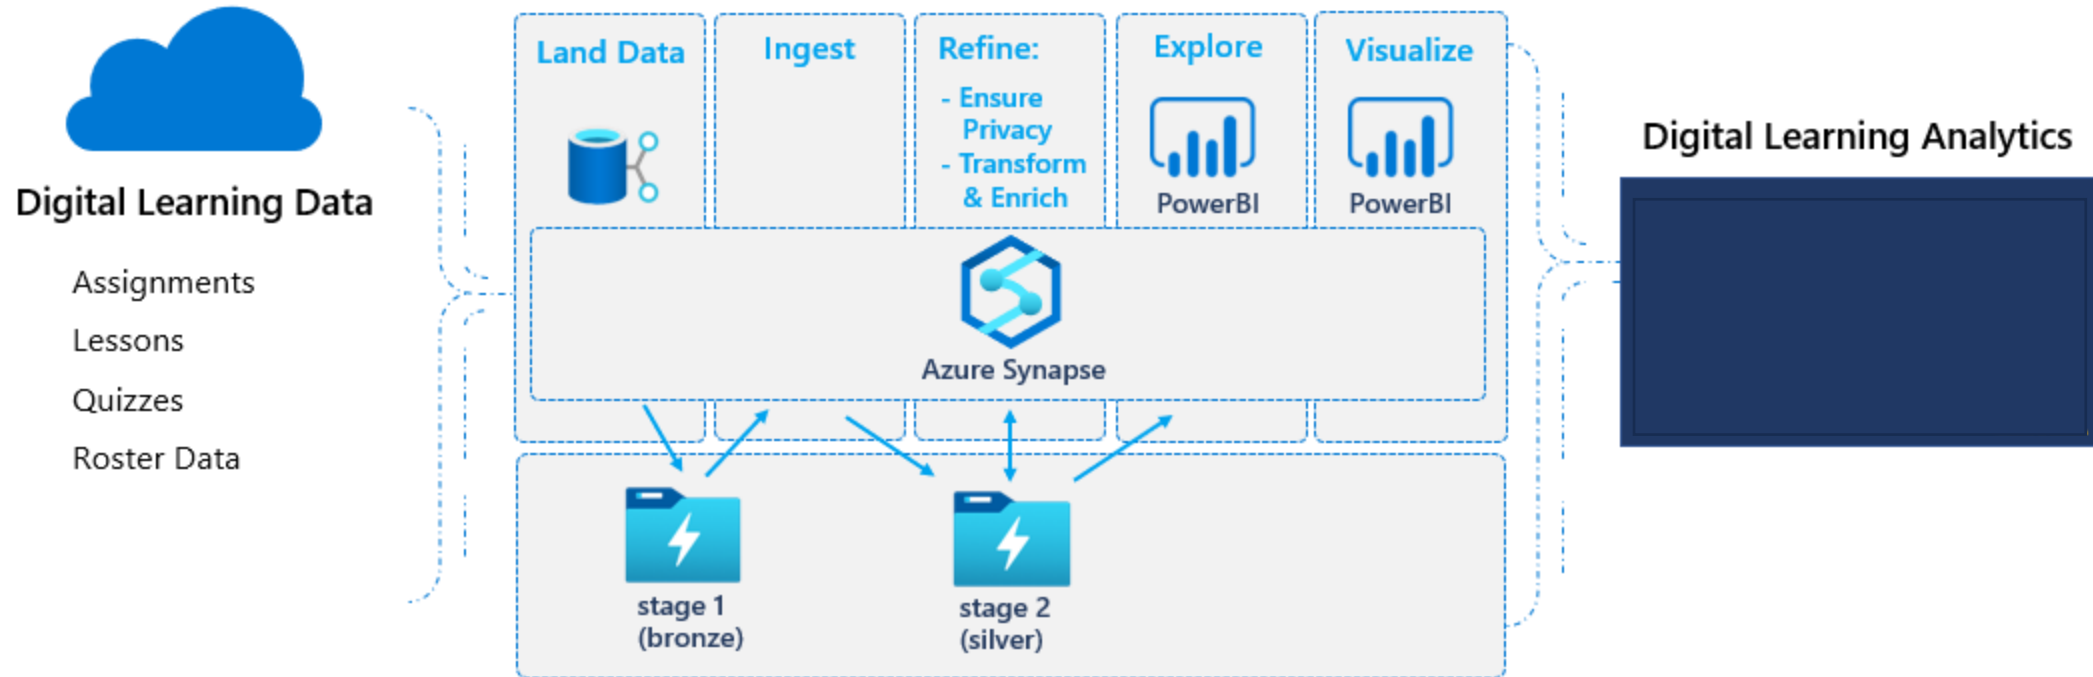

School Accounting Systems

- QuickBooks
- Zoho
- Microsoft Dynamics
- Microsoft Business Central
- Sage

Other Systems

- IPEDS
- Microsoft Intune
- Microsoft Community Training
- Microsoft Graph

Architecture Overview

Standards Based Implementation

- LTI Standard: Learning Tools Interoperability
- Common Cartridge Standard
- CASE Standard: Competencies and Academics Standard Exchange
- QTI: Questions and Test Interoperability
- Caliper Analytics Standard
- EMS Global Data Privacy Standard
- Open Educational Resources (UNESCO) [Learn More ...](#)
- Azure Cloud Compliances ([Learn More ...](#))

AI and ML Use Cases

Open AI based Models

- Automated k-12 tagging of questions based on Natural Language Processing
- Generative AI to create smart content for improving student performance
- Chatbots tailored to specific curriculum content that students can use to improve their grades
- “Co-Pilot” like assistants for improved grammar and style of writing
- AI based curriculum design

Custom Implementations

- Student engagement prediction (Using Calipers Data)
- Assessment fairness prediction (e.g., using Typing DNA or monitoring browser, camera and microphone usage)
- Automated grading of assignments (AI model trained on historical model)
- Content recommendation engine for Teachers
- Predictive Analytics for student performance
- AI models to predict plagiarism in essays
