

Atidot

Makes Insurance Smarter

Use Atidot to predict customer insurance needs, lapse patterns and profitability. Build smart segments and gather personalized insights.

The Challenge

Life insurance marketing campaigns have traditionally been costly with low yield. Marketing campaigns have little to no understanding of the target audience. Even when carriers are successful in on-boarding a client, a quick lapsation can result in a negative impact on your bottom line.

The Solution

Automatic Feature importance analysis

Validation tool compared to existing benchmarks

Smart data preparation including external data sources

Optimization, simulation and what if scenarios

Insurance behavior modeling based on Machine Learning, AI and actuarial models. Connected to the business. Integrated with your system and connected to your sales force.

Why Atidot

Atidot offers a pioneering platform designed to address the specific needs of life insurance carriers. Our platform is suitable for use by non-technical teams and delivers actionable results across all specialties. The system was designed by a team of data and actuarial experts.

Analyse new and external features automatically

Understand what drives your clients' decision making, to tailor products and actions

Cut costs while increasing profitability
