

Cut complexity and redirect your IT spend — in just one day.

Your business demands agility, but years of growth, mergers, and quick fixes have left you with an application portfolio that's bloated, costly, and holding you back. Budgets get stuck in maintenance instead of fueling innovation. The **App Rationalization Workshop** clears the fog empowering you to simplify, reduce costs, and prioritize modernization with confidence.

The outcomes that move you forward — **starting now**

- **A comprehensive current-state application and infrastructure map**, giving you total visibility into how your business processes are supported and where inefficiencies hide.
- **Clear identification of rationalization opportunities** (retain, retire, replace, re-platform, rehost), so you know exactly where to reduce waste and focus investments.
- **A prioritized modernization plan**, grouped into waves by business impact and value helping you act decisively and avoid endless analysis.
- **An executive readout report** with key findings, recommendations, and a roadmap to next steps enabling stakeholder alignment and faster decision-making.

HOW IT WORKS

Pre-Workshop Alignment

A one-hour planning session to align on business objectives, scope, and success criteria ensuring every discussion is focused on what matters most.

Workshop Session(s)

We drive alignment across business and IT, map processes to applications, identify inefficiencies, and prioritize actions using our impact-effort-feasibility model culminating in a clear, phased roadmap and executive-ready recommendations.

Actionable Deliverables

A Comprehensive summary report, application process map, rationalization insights, modernization plan, and executive presentation to guide your next moves.

TAKE THE FIRST STEP — STRATEGICALLY

Stop pouring money into applications that no longer serve your future. With the App Rationalization Workshop, you gain the clarity to simplify, optimize, and accelerate modernization without guesswork.

Book your workshop today.
