

Move from data exposure risks to Copilot-ready confidence — in one focused assessment.

Your organization is eager to unlock the power of Microsoft 365 Copilot. But hidden data risks, stale permissions, and uncontrolled sharing can undermine trust and open the door to costly compliance failures. Many teams hesitate, unsure how to move forward securely. The **M365 Copilot Risk Assessment** eliminates uncertainty, empowering you to adopt Copilot with clarity and control.

The outcomes that move you forward — **starting now**

- **Immediate visibility into your most critical data exposure points**, empowering you to address oversharing risks and build confidence before enabling AI at scale.
- **A prioritized, business-aligned remediation roadmap** that transforms ambiguity into actionable next steps so you can secure buy-in and accelerate adoption.
- **A deep analysis** of permissions, sensitive data locations, and identity controls, mapped against Zero Trust principles and the NIST AI Risk Management Framework.
- **A strengthened security and compliance posture** that aligns with Microsoft best practices, reducing the risk of breaches and regulatory penalties as you scale Copilot.
- **An executive-ready risk report and technical roadmap**, arming your leadership team with the insights needed to make informed, risk-aware decisions.

HOW IT WORKS

Risk Discovery

In-depth analysis of your Microsoft 365 environment — including SharePoint, OneDrive, and Teams — to identify oversharing, misconfigurations, and shadow data risks.

Risk Analyzer

Risk scoring across control and data planes using Microsoft-native telemetry, enriched and accelerated by Atmosera's proprietary Risk Analyzer technology, to surface your most critical vulnerabilities and compliance gaps.

Actionable Deliverables

A comprehensive executive summary with a clear prioritized action plan, covering technical fixes, governance improvements, and business-aligned next steps to guide your secure Copilot rollout.

TAKE THE FIRST STEP — SECURELY

Stop guessing and start leading. With the M365 Copilot Risk Assessment, you gain the insights and confidence needed to adopt AI responsibly and stay ahead.
