

Modernize your applications and data to accelerate time-to-market and deliver new experiences for your customers. Achieve greater agility and scale with built-in security and high availability. Atmosera, a Microsoft Gold Partner with an advanced specialization in Modernization of Web Applications, has long experience in moving enterprise applications and data to Azure and the modern web.

Deliver enhanced application and data experiences even faster

Get the most value from the Azure cloud by modernizing your applications and data to best align with your business objectives, including hybrid and multi-cloud environments.

Accelerate Time to Market

Improve time to market by using fully managed application and data services.

Quickly deploy apps using low-code application development.

Build on containers with Azure Kubernetes Service (AKS.)

Deliver Innovative Experiences at Scale

Create rich experiences for your customers and employees.

Get data-driven insights across applications, infrastructure, and databases to increase efficiencies.

Deliver experiences quickly and continuously with high-performance app and database tools.

Increased Security and Reliability

Keep workloads more secure, optimize throughput and identify problems in seconds.

Keep databases up to date and automate tasks like high availability, disaster recovery, backups.

Atmosera's App & Data Modernization Services

- **Application and Data Modernization** - Re-build, re-platform, and re-imagine your apps and data to take advantage of modern web, data, and cloud platforms and technologies.
- **Discovery and Assessment** - Atmosera can perform an assessment of your current legacy applications and systems, and provide you with recommendations.
- **Migration to the Cloud** - Move your apps and data to the cloud, with both apps and infrastructure-based solutions.
- **Remediation Services** - Atmosera can enhance your current applications and systems for easy maintainability & scalability.
