

Cloud Application Transformation

Modernizing and building cloud native applications for enterprises that aid in adopting the right models for the right applications to transform and evolve business. With a wide range of experts under one roof, you can rely on Atos for comprehensive services to simplify your transformation and accelerate time to value on Azure.

Execution Strategies and Solutions

Strategic Roadmap Assistance

Application portfolio cloud readiness and roadmaps for your migration to cloud modernization on Azure.

Experience Design

Consultative approach to designing the next gen application experience while accurately estimating costs and efforts.

Rationalization

Designing and executing programs to inventory, rank, and convert to the cloud or dispose of applications.

Migration

Leveraging tools and automation to plan and execute the migration of infrastructure, apps, and data to Azure.

Legacy Modernization

Reengineering on-premise apps and databases in order to efficiently move them to the cloud.

Cloud-Native Build

End-to-end design and build of cloud-based greenfield applications using microservices on Azure.

DevSecOps as a Service

Plan, design, and build modern, secure CI/CD pipelines for app dev environments with regulatory support.

Application Platform Services

Use the world's most comprehensive catalog of Kubernetes-based services to build and manage modern applications.

How It Works

Through a custom Atos OneCloud Plan, our consultants will develop a deep understanding of your business and help you understand the potential impact and business case for leveraging technology to transform your business through digital strategy and innovation, all on Azure. This includes program management and change enablement plans from strategy to implementation and operations via managed services.

Customer Outcomes

Increase in business flexibility by opening and extending legacy applications to new services and platforms

Improved speed to market of new applications to support growth and operational excellence while quickly responding to rapidly changing market dynamics

Reduction in business, operational, and technical risk via decommission, rewrite, or replacement of legacy applications while fully protecting the data capital

Think-Starter Workshop

Two-hour highly collaborative workshop approach that starts with realities of today, generates targeted changes toward the future state, and produces an executable roadmap guided by business outcomes.

Objective: Understand your current landscape & challenges and then create a vision of the future

Current State

Vision & Drivers

Ideation

Market Trends

Pain Points & Opportunities

Benchmark

Outcome: Recommendations for a Cloud Application Transformation assessment that will produce quick value for our client's business and transformation roadmap.

Customer Success Stories

Experience Design

Designed a B2B eCommerce and self service portal customer experience for a global manufacturer.

App Rationalization, Refactoring & DevOps

Refactored large portfolio of applications and drove enterprise wide adoption of DevOps to support cloud native application development.

Managed Apps

Refactored and rationalized applications portfolio. Migrated to cloud based platform in order to drive agility and increase competitiveness.

With a rich heritage in legacy infrastructure paired with the transformative and hybrid capabilities of the Azure cloud, Atos is your one-stop shop for all your application, infrastructure, and cloud needs.
