Digital Cloud Platforms

Giving organizations the end-to-end integration and automation needed for the best in class performance through legacy, private, public, or a multi-cloud platform. With a wide range of experts under one roof, you can rely on Atos for comprehensive services to simplify your transformation and accelerate time to value on Azure.

Execution Strategies and Solutions

Digital Cloud Services

An Azure-focused approach that provides continuous guidance on adopting and managing cloud-native services from end-to-end.

Cloud Connectivity

Achieve high performance WAN connectivity across Azure, datacenters and end users. Cloud Connectivity extends Atos datacenter connectivity to Azure and WAN providers via co-located access points.

Cloud Financial Management

Bringing better visibility to cost uncertainty, backed by analytics and consultancy services to better forecast and predict cloud spend on Azure.

Digital Hybrid Cloud

A scalable and future-proofed multi-cloud solution that combines all the innovation and scale of a public cloud with the security and control of a private cloud.

Multi-Cloud Management

Delivering a cloud-like experience for on-premise hosting clients with integrated ops across all clouds ensuring workloads are placed in an environment best for business.

Data Protection as a Service

Bringing operational maturity, robust security, and governance to the cloud with a shared risk/reward model.

Digital Kubernetes Services (DKS)

Achieve end-to-end management of distributed Kubernetes clusters on premise or on Azure. DKS provides consistent services across multi-cloud to enable cloud-native applications.

How It Works

Through a custom Atos OneCloud Plan, our consultants will develop a deep understanding of your business and help you understand the potential impact and business case for leveraging technology to transform your business through digital strategy and innovation, all on Azure.

Customer Outcomes

Run legacy and new applications together, allowing design and deployment of modern applications

Better control and visibility of cloud management, spend, and reporting

Integrated operations across all clouds, ensuring workloads are placed in an environment best for business

Atos

Think-Starter Workshop

Two-hour highly collaborative workshop approach that starts with realities of today, generates targeted changes toward the future state, and produces an executable roadmap guided by business outcomes.

Objective: Understand your current landscape & challenges and then create a vision of the future

Current State	Vision & Drivers	Ideation	Market Trends	Pain Points & Opportunities	Benchmark

Outcome: Recommendations for a Digital Cloud Platforms assessment that will produce quick value for our client's business and transformation roadmap.

Customer Success Stories

Hybrid Cloud Connectivity

Ideal for customers using Atos private and hybrid cloud services with applications and/or data spanning both private and public clouds. The result is a simple, secure, and flexible multi-cloud access.

WAN Aggregation

Ideal for customers using Atos private and hybrid cloud services with multiple regional WANs. The result is carrieragnostic customer WAN aggregation interconnected to the cloud services.

Data Center Cross Connect:

Ideal for multinational customers using Atos private and hybrid cloud services with applications and/or data hosted in Atos data centers in different regions and countries. The result is flexible, on-demand connectivity and bandwidth between Atos data centers.

With a rich heritage in legacy infrastructure paired with the transformative and hybrid capabilities of the Azure cloud, Atos is your one-stop shop for all your application, infrastructure, and cloud needs.
