

Digital platforms for SAP

Supporting the modernization, migration, and operations of core ERP systems on Azure, while enabling continuous innovation with analytics and AI/ML along your journey. With a wide range of experts under one roof, you can rely on Atos for comprehensive services to simplify your transformation and accelerate time to value on Azure.

Execution Strategies and Solutions

Ready for S/4

A complete end-to-end assessment offering that provides a TCO analysis and business case to move to S/4HANA from the current legacy ERP environment, along with a landing zone recommendation.

Pathway to S/4

Significantly reduces the cost and optimizes the conversion by using a high degree of automation for code remediation and testing. The offering provides standardization by using the conversion factory.

Auto Provision of SAP Systems

Using a high degree of automation for migrating SAP workloads to Azure, we can significantly reduce the onboarding time while also reducing the cost of migration. Average TCO savings is 20 to 40%.

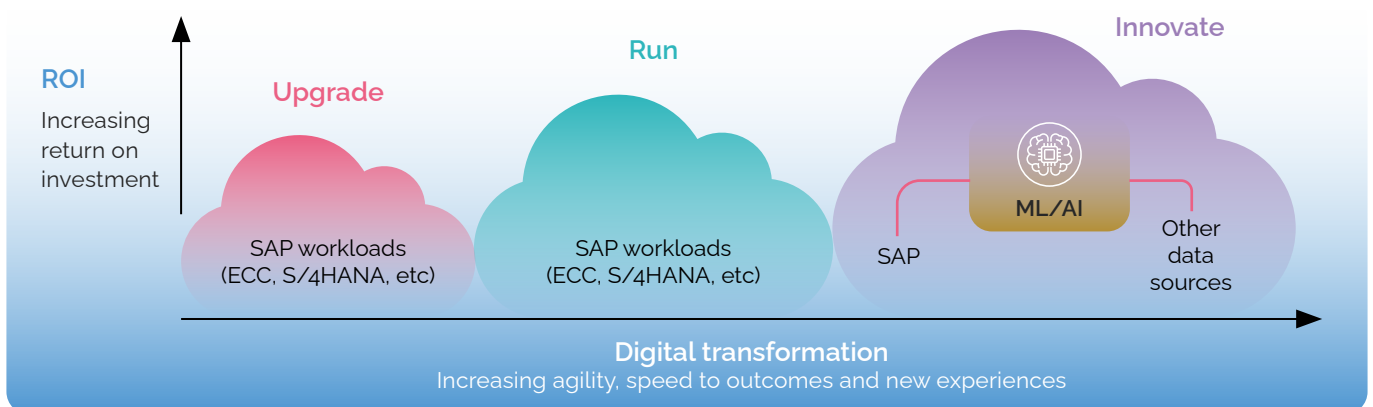

AI Ops4SAP

Next generation SAP application and platform management using AI/ML to provide automated resolution and incident management. With AI Ops4SAP, we decrease operational costs while increasing operational efficiencies.

How It Works

Through a custom Atos OneCloud Plan, our consultants will develop a deep understanding of your business and help you understand the potential impact and business case for leveraging technology to transform your business through digital strategy and innovation all on Azure. This includes financial engineering to fund your transformation through a combination of DCF on efficiencies and datacenter sale proceeds.

Customer Outcomes

Support for all SAP databases (HANA, Sybase, Oracle, MS-SQL server)

Data protection and security using Atos Security Management Solutions

Enable continuous innovation that drives agility, efficiency, and cost saving

Think-Starter Workshop

Two-hour highly collaborative workshop approach that starts with realities of today, generates targeted changes toward the future state, and produces an executable roadmap guided by business outcomes.

Objective: Understand your current landscape & challenges and then create a vision of the future

Current State

Vision & Drivers

Market Trends

Pain Points & Opportunities

Benchmark

Outcome: Recommendations for SAP assessment that will produce quick value for our client's business and transformation roadmap.

Customer Success Stories

Hybrid Cloud Connectivity:

Ideal for customers using Atos private and hybrid cloud services with applications and/or data spanning both private and public clouds. The result is a simple, secure, and flexible multi-cloud access.

WAN Aggregation:

Ideal for customers using Atos private and hybrid cloud services with multiple regional WANs. The result is carrieragnostic customer WAN aggregation interconnected to the cloud services.

Data Center Cross Connect:

Ideal for multinational customers using Atos private and hybrid cloud services with applications and/or data hosted in Atos data centers in different regions and countries. The result is flexible, on-demand connectivity and bandwidth between Atos data centers.

With a rich heritage in legacy infrastructure paired with the transformative and hybrid capabilities of the Azure cloud, Atos is your one-stop shop for all your application, infrastructure, and cloud needs.
