

Intelligent Collaboration M365 Data Governance

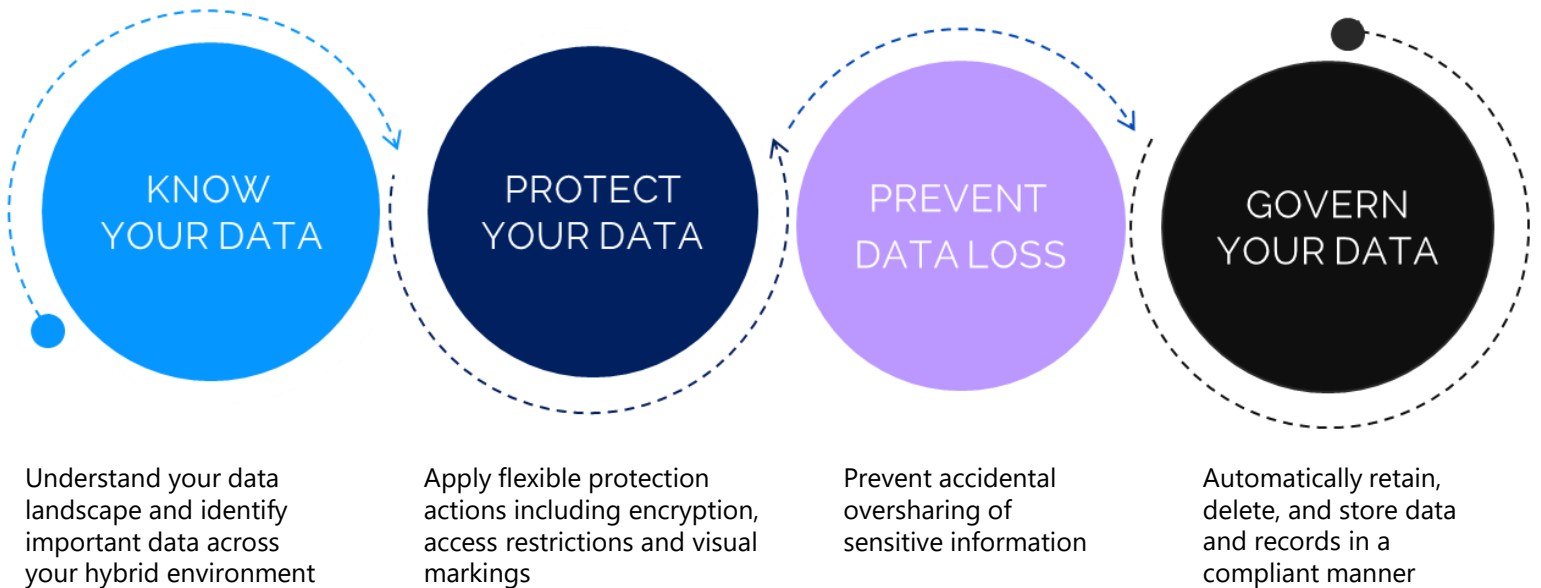

Atos – leaders in increasing productivity and employee satisfaction with seamless communication collaboration, data protection and data governance

Protecting information is critical to ensuring trust but also to meeting internal and external privacy and regulatory requirements. Protecting data has become more challenging as people work in new ways, creating and sharing data across boundaries. While mobility and cloud services have helped users become more productive and collaborative, securing and monitoring data has become harder.

The Atos M365 Data Governance service empowers an organization to discover, classify, govern and protect sensitive data within the M365 & O365 environment.

Rolling out M365 Data Governance will help:

- Reducing risks of data losses and associated massive recovery costs and reputation damage.
- Meeting compliance regulations with evidence-reducing risk of fines

With M365 Data Governance Atos created a comprehensive set of solutions enabling organizations to protect and govern data, throughout its lifecycle – wherever it lives, or wherever it travels. The exponential growth of data, blurring of traditional organizational boundaries and acceleration of collaboration among the workforce has made protecting and governing important data more challenging than ever. M365 Data Governance Atos enables clients to mitigate and protect against the privacy and regulatory risks with Microsoft 365 Information Protection and Governance services and products

Atos delivers M365 Data Governance which enables Microsoft 365 Information Protection and Governance micro-services to mitigate and protect against the privacy and regulatory risks.

Why Atos?

By 2025, more than 99 per cent of cloud breaches will have a misconfiguration or client error as the root cause," Gartner 2021. Atos has experience with M365 configuration and can prevent this. Atos manages support for 1.7 million hybrid M365 users and has a large number of M365 configuration experts and M365 security certifications. Atos is also ranked 2nd in the world for Managed Security Service revenue. This combined expertise makes Atos a trusted partner to meet client challenges.

Why M365 Data Governance fits your organization ?

Organizations now need to protect sensitive information across devices, SaaS applications, and cloud services in addition to on-premises environments. But before an organization can protect its data, they first must know where it resides, how it is being used and shared, what the associated privacy and regulatory risks are, and even if the data is still needed.

Atos M365 Data Governance addresses the topics above and will help our customer to know their data, protect their data, prevent the loss of data and to govern that data.

Intelligent Collaboration Atos M365 Data Governance

Our promise

- Ensures confidence to detect and prevent loss of sensitive data.
- Prevents that corporate data is no longer 'dark' as it is classified, protected and governed.
- Protects and governs sensitive data so that Companies' data is no longer concern for complying with regulations.
- Types of data covered in Microsoft 365 include chat sessions in Microsoft Teams, emails in Exchange, and files in SharePoint and OneDrive.

Partnering with Atos and Microsoft for M365 Data Governance will ensure that:

- M365 Sensitive Data is detected and classified to minimize risk of loss both internally and externally
- Compliance regulation assessment reports provide evidence required
- Risk management of M365 Data has ongoing Governance
