

# Atos Microsoft Platform Services

## Microsoft 365 Services

Microsoft 365 is a productivity suite consisting of Office 365, Windows 10 & Enterprise Mobility and Security, required by enterprises to achieve more with innovative Office apps, intelligent cloud services, and world-class security.

Atos Microsoft 365 offering is a productivity cloud transformation service for defining productivity cloud enablement strategy & transformation roadmaps for enterprises across entire product stack i.e. Outlook, Teams, Calendar, OneDrive, SharePoint Online, Intune, Active Directory etc. enabling organizations at various stages of productivity cloud adoption journey to decide their future course with reduced carbon footprints. Atos has a set of proprietary IPs (tools, accelerators, frameworks, standardized methodologies), Industrialized Migration factory, its global experience, Decarbonization Level Agreements with various deployment models based on business/technical characteristics of legacy/on-premise/online applications.

### Customer Benefits:

- Industrialized approach for Microsoft 365 transformation using migration factory tools, accelerators & other IP assets.
- Seamless transformation with zero downtime and enhanced business productivity.
- Risk free transformation by highly experienced team having 20+ years of similar transformation experience and strategic partnership with Microsoft
- Reduced TCO with higher end user satisfaction
- Reduced carbon footprints

## Microsoft Dynamics 365

Dynamics 365 is a suite of intelligent applications unifying the capabilities of CRM, ERP & Project Management, that work seamlessly across sales, marketing, customer service, field service, project management, financials, operations, commerce and customer insights.

With Microsoft Dynamics 365 comes the freedom to build, manage, and deploy applications on a massive, global network; getting customer organizations future ready & providing the agility they need to deliver the best customer experiences. Customers using Dynamics 365, in addition to getting the capabilities within the product, also have direct access to the wider Microsoft product stack i.e., Microsoft 365 and Microsoft Azure in a cost-effective manner.

Atos is having Silver level partnership with Microsoft in Cloud Business Applications and has End to end capability across different modules of ERP (F&O, Commerce, Human Resource) , CRM (Sales, Marketing, Customer Service, Field Service etc.) , Project Operations (Project planning, time & expense, resource management etc.) & Dynamics Business Central. Atos' USP is the set of proprietary IPs (frameworks, templates, Upgrade methodology, jump start kits, packaged offerings), it's global experience, Decarbonization Level Agreements & other variants offered as part of this service.

Atos Dynamics 365 services help to migrate applications from Dynamics on-premise to cloud, using Microsoft Fast Track methodology coupled with Atos's proprietary Upgrade methodology and accelerators etc. for Data Migration. Atos' Dynamics 365 Online services also help to transform from legacy ERP/CRM applications to Dynamics 365 Online.

Atos' Dynamics 365 offering helps customers to design and implement their ERP & CRM processes, manage the complexity of implementations/ upgrades, help to optimize their costs, and manage changes to increase the user adoption.

#### Customer Benefits:

- Scalable & sustainable solution and integration with multiple backend systems/Native as well as Third party applications.
- Integrated system to cover the complete business processes for the different business units and automation of processes.
- Unified business processes
- Industrialized approach for Dynamics transformation globally using Atos tools, accelerators, frameworks, templates & other IP assets.
- Seamless and risk-free transformation by highly experienced team having several years of similar experience and strategic partnership with Microsoft
- Reduced carbon footprints

#### Power Platform

Power Platform is the low-code platform that spans across and seamlessly integrates with Microsoft 365, Azure, Dynamics 365 and standalone applications. It helps organizations to innovate anywhere by unlocking its value everywhere.

With Microsoft Power Platform comes the freedom to build, manage, and deploy applications on a massive, global network, getting your organization future ready and empowers business users with the ability to use things like artificially intelligence, mixed reality, using Dataverse (build on Common Data Model) and a wealth of other technology and providing the agility they need to deliver the best device agnostic customer experiences.

Atos provides End to End Power Platform services which includes consult, build , run & governance services and has capability to assists organizations at any stage of their transformation journey to embrace Power Platform and help them to innovate with utmost focus on user satisfaction with a better return on investments.

Atos's Power Platform offerings enables organizations to analyse data, act on it through applications, automate & govern the processes by using industrialized methodologies, effective accelerators and combine best practices from Microsoft & our own insights and experiences. It empowers everyone from citizen developers to professional developers to create a solution as per the business need. We help organizations define the right service model with the best outcomes in terms of performance, security, scalability & maintenance.

#### Customer Benefits:

- Improved productivity
- Innovate quickly and get faster results
- Ensure enterprise quality with built in apps and solution checkers
- Higher end user satisfaction & reduced carbon footprints
- Digitalized and automated processes.
- Reduced bottleneck of IT infrastructure and development life cycle.
- Device agnostic applications with social integration capabilities with reduced performance & sustainability risks

#### SharePoint

SharePoint helps organizations share and manage content, knowledge and applications to empower teamwork, quickly find information and seamlessly collaborate across the organization.

Atos is having Gold level partnership with Microsoft in Collaboration & Content category and provides robust and industrialized services to transform customer's existing content & collaboration landscape seamlessly to Microsoft's Content & Collaboration environment.

Atos SharePoint Services help organizations to adopt SharePoint by assisting in all aspects i.e. "How", "What", "Why" part of their transformation journey with its best-in-class tools, accelerators, frameworks, jump start kits, in-depth experience.

Atos SharePoint services help to migrate SharePoint Farms from on-Premise to cloud by using either Microsoft native tools or third-party centralized assessment & migration tools, or Atos tools/ accelerators /kits hosted.

Atos also helps organizations in defining content & collaboration strategy & transformation roadmaps, enabling organizations at various stages of collaboration to decide their future course with reduced carbon footprints.

Atos' USP is its set of proprietary IPs (tools, accelerators, frameworks, standardized methodologies, jump start kits, packaged offerings), Industrialized migration factory & CoE, its global experience, Decarbonization Level Agreements & other variants offered as part of this service.

#### Customer Benefit

- Industrialized approach for SharePoint transformation globally using migration factory & CoE tools, accelerators & other IP assets.
- Seamless transformation with higher integration and enhanced level of collaboration.
- Risk free transformation by highly experienced team having 20+ years of similar experience and strategic partnership with Microsoft
- Higher end user satisfaction
- Reduced carbon footprints
- TCO reduction
- Enhanced collaboration & productivity

#### Azure Services

Azure is a cloud platform—with solutions including Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS) that can be used for services such as analytics, virtual computing, storage, networking, build, run and manage applications and much more.

Whether organizations are existing Azure users or thinking of moving to Azure, public cloud transformation is a significant initiative that requires expert planning, design, implementation, and ongoing management, both from a technology perspective as well as managing change internally, externally and also for their customers.

Atos is one of 50 partners globally, and 25 in North America with Microsoft Azure Expert Managed Services Provider (MSP) designation and your trusted digital partner for Microsoft Azure.

Our Azure consult, build, migrate, and run services, adoption framework, and methodologies combine best practices from Microsoft's Azure Cloud Adoption Framework and our own experiences to guide organizations to define the right service model. We help organizations select the best Azure components for best outcomes in terms of performance, security, scalability, maintenance, and cost. Moreover, we also manage the complexity of transformation, the ongoing consumption of Azure services and the change process to increase user Azure adoption.

Customer Benefits:

- Optimized and controlled Azure costs
- Continually improved and fine-tuned Azure services, for example integrating Azure into a multi-cloud environment using our Hybrid/Multi-Cloud management model
- De-risked and accelerated Azure transformation by highly experienced team whether you are making your first move to public cloud or migrating more workloads to Azure
- A single vendor who manages the whole process end-to end, including Azure Adoption and Change Management.
- Higher end user satisfaction & reduced carbon footprints
