# Ensure your Azure adoption success

About atSistemas:

We are a consulting, IT services and software development company created in 1994 with more than 1,700 professionals. We offer innovative solutions and help more than 400 clients in their Digital Transformation, as well as work on international projects

Azure Governance Assessment

We propose a 4-week assessment to define a Governance Model to help customers on their Azure Adoption.

The main objective of atSistemas is to define a governance model in Azure to help customers in how they should manage applications, systems and data to keep a well-defined control of its tasks and processes of resources in Azure, such as managing users and permissions, naming resources, managing workloads, multiple environments and other tasks related to the customer IT department.

Azure Enterprise → Departments → Accounts → Subscriptions → Resource Groups → Resources

Why do you need a Cloud Strategy?

Avoid common fall pits

While many enterprises have announced a "Cloud-First" approach, not all have a well-defined strategy that communicates the "why", "how", or even the "what" of cloud adoption. A cloud strategy is essential to guide your organization through the transition to the cloud by balancing expected benefits with guardrails to reduce risk exposure.

Without a strategy, business groups and users will adopt solutions to increase productivity as they become available. Many organizations have already experienced this in the form of "Shadow IT". The absence of a cloud strategy leaves these teams with little guidance for cloud service adoption leading to silos of technology, non-standard solution implementations, non-optimized costs, and greater exposure to risk from poorly configured environments..

Assessment execution and deliverables

Week 1	Week 2	Week 3	Week 4	
Analysis	Build Cloud Strategy		Deploy and present	accompany

A consultancy will be carried out in three phases:

1. **Customer analysis**. From the point of view of structure, systems and billing processes.
2. **Definition of Government Strategy**. From the perspectives of Organization, Security, Scalability and costs.
3. **Delivery and Implement**. In this phase, we will deliver and explain a guide that will include at least these sections:
   - Administration and cost control according to departments
   - Application of cloud policies for projects
   - Resource Organization aligned with customer departments
   - Standards and conventions for projects
   - Definition of internal security policies and boundaries.
   - Management and security policies for the cloud
   - Configuration of environments and scenarios for cloud projects.
   - Compliance with regulatory requirements

We are constantly growing with the spirit of a start-up, creating value and attracting talent.

Our offices are in Madrid, Barcelona, Cadiz, La Coruña, Santiago de Compostela, Mallorca, Zaragoza, Huelva, Seville, Milan and Lisbon
