Azure Enterprise Cloud Adoption Framework with Redapt

Adopt the cloud by leveraging best-in-class solutions to spur innovation

Redapt's Azure Cloud Adoption Framework Landing Zone solution allows organizations to quickly deploy an Azure environment based on the best practices and guidelines from Microsoft's Cloud Adoption Framework and enables organizations to being migrating to Azure.

Azure Landing Zone is the output of a multi-subscription Azure environment that accounts for scale, security, governance, networking, and identity. This output enables application migrations and greenfield development at an enterprise scale in Azure, consider all platform resources that are required to support the customer's application portfolio, and don't differentiate between IaaS or PaaS.

Azure Enterprise Cloud Adoption Framework with Redapt

4-week program overview

Redapt will review the design areas that comprise a landing zone in adherence with regulatory guidelines and following best practices.
Redapt will perform the following activities:

Phase 1 – Plan & Ready

During this phase Redapt will review the applications, their design, and the best path forward in Azure. This is where Redapt will propose various options such as Migrate or Innovate.

Phase 2 – Adopt & Govern

We conduct workshops to provide insights and guidance for the creation of a landing zone. We then create a reliable, auditable, and flexible governance framework to ensure the successful adoption of Azure.

Phase 3 – Manage

After the Azure adoption we help you maintain best practices and control of the environment. This will allow for better visibility into utilization and cost management.

Why Redapt?

As a Microsoft Gold partner, Redapt helps enterprises accelerate business growth through the navigation and adoption of the powerful cloud computing capabilities of Microsoft Azure.

Redapt has been a major cloud influencer since the inception of Azure by aligning with field co-selling and deploying hybrid cloud-native solutions at some of the world's largest hyper-scaling clients.

Rooted in technical excellence and business outcomes, Redapt deploys application innovation, modern datacenter, and data and AI services to transform our clients' businesses to compete, grow, and respond to ever-changing business environments.

Paired with a world-class MSP, Redapt does not just lead clients into the cloud but aids them through every stage of their cloud adoption and value realization journey.

From initial assessments and recommendations to cloud migration, app modernization, and training, we can help you adopt the cloud and achieve true value from your investments

Meet Redapt

Providing a clear path forward in a complex
and constantly changing tech landscape.

Infrastructure

- Datacenter Infrastructure
- Advanced Engineering Services
- Infrastructure System Integration
- Global Logistics
- IT Asset Disposition

Operations

- DevOps Automation
- Site Operations
- Modern Datacenter
- Managed Services

Cloud Engineering

- Public Cloud Implementation
- Hybrid Cloud Implementation
- App & Data Migration
- Emerging Technology Integration

Business Transformation

- Cloud Native Apps
- Advanced Data & Analytics
- Artificial Intelligence
- DevOps Enablement
- IoT and Edge Solutions
