

# Redapt's Approach to ISVs Migration to Azure

Microsoft Azure is a rapidly evolving cloud services platform. Azure and cloud-based technologies have completely revolutionized the ISV industry just in the last few years. While the number of start-ups has proliferated, many of the industry leading ISVs have either started or completed the shift to a modern Azure based environment to stay nimble and competitive. For ISVs working with other hyperscalers or on-premise infrastructures, while the benefits of using Azure are great, the planning and executing a cloud transformation process could seem overwhelming and challenging. With extensive experience with helping ISV's adopt Azure, Redapt solves such issues and fully incorporates the benefits of Azure.

In this engagement, the Redapt team will work with you to conduct an assessment, design and migration of your solution. Step 1 is a detailed discovery that includes, business need, scope, current design and dependencies. Step 2 focuses on an assessment that provides details on the current landscape. Additional toolsets may be used to estimate specific coding recommendations to remediate applications to be Azure ready. Step 2 provides the recommended architecture, configurations and steps required to achieve the desired migration. Information from these steps will be compiled into a detailed report and then reviewed with the applicable team(s). This information will serve as the foundation for Step 3 which comprises of migration and day 2 support.

Engagement Outline		
Step 1 - Discovery	Step 2 - Assess & Design	Step 3 - Migrate
<ul style="list-style-type: none"> <li>• Business drivers</li> <li>• Scope</li> <li>• Application SLA's</li> <li>• Compliance &amp; security needs</li> <li>• APIs and 3<sup>rd</sup> party dependencies</li> <li>• Identify Azure integration points</li> </ul>	<ul style="list-style-type: none"> <li>• Detailed Azure Architecture</li> <li>• Detailed Service dependencies</li> <li>• Detailed Compliance/ Security design</li> <li>• Project Plan and roadmap</li> <li>• Test and UAT plan</li> </ul>	<ul style="list-style-type: none"> <li>• Detailed Project Plan</li> <li>• Deploy Azure landing zone</li> <li>• Migration</li> <li>• Develop CI/CD processes</li> <li>• Testing &amp; Acceptance</li> <li>• Assistance with publishing to Azure Marketplace (optional)</li> <li>• Managed Services (optional)</li> </ul>
