Enhance your employee experience with Microsoft Viva

ABOUT atwork

We develop business solutions based on technologies as Microsoft 365 and Microsoft Azure. We are specialized in consulting and developing a line of business apps, cloud computing workloads, and web solutions. As Microsoft Gold Certified Partner, we can offer our customers services and products at the highest level since 1999.

See what customers are saying:

"From individual learning to team collaboration - raising awareness of downtime and creative phases - with Microsoft Viva, my personal workday becomes a varied experience."

- Jessica J.

WHAT WE OFFER

The new application Microsoft Viva (MS Viva) is an organizing layer of employee experiences, powered by Microsoft 365. MS Viva positions as an Employee Experience Platform (EXP), which brings together tools into one solution (MS Teams).

Microsoft Viva consists of four modules:

1. **Connections** - amplify culture and communications

2. **Insights** - balance productivity and wellbeing

3. **Learning** - accelerate skill-building and growth, and

4. **Topics** - harness knowledge and expertise.

It delivers personalized and actionable insights and offers trustful privacy and security. Organizations need this for hiring people (onboarding, checks, training) and connecting people (f.e. first-line workers).

We offer you a consulting service to help you orient and get ready for Microsoft Viva.
